Virginia Department of Environmental Quality

List of Approved Underground Storage Tank Operator Training Providers

The courses provided by the companies listed below have been reviewed by the Department of Environmental Quality (DEQ) and have been determined to meet the minimum qualifications as required by Section 125 of Virginia's Underground Storage Tank (UST) Technical Regulation (§9VAC25-580 et seq.) or have been approved by another state as meeting their state specific guidelines for UST Operator Training. Training programs approved via reciprocity only may not be Virginia UST regulation specific. This list will be updated periodically as additional training programs are approved. Class C Operators will most likely be trained by certified Class A and Class B Operators as provided in the Regulation and are not included on this list. Inclusion on this list does not represent an endorsement or recommendation by DEQ.

Note: Classroom training providers may offer training in various locations. It is recommended that operators contact the training providers for dates, locations, and times of training.

Class A and Class B Operator Training Providers
