SECTION C: Findings of Fact and Conclusions of Law

1. Centerpointe is developing the Property in Chesterfield County, Virginia.

2. On December 5, 2012, DEQ issued the Permit to Centerpointe for wetland impacts associated with the development of Centerpointe Crossing Section 1. The Permit expires on December 4, 2019.

3. On July 12, 2013, DEQ staff conducted an inspection at the Property and a file review. DEQ staff inspected the Property for compliance with the requirements of the State Water Control Law, the Regulations and compliance with the Permit. The DEQ inspector observed the following:

   a) Erosion and sediment controls downstream of authorized Impact Area two and at another area, approximately 900 feet north, failed and allowed sediment, a pollutant, to escape containment and deposit into State waters. The sediment caused unauthorized wetland impacts in these two areas totaling 0.07 acre.

      VWP Permit WP4-12-1632 Part I.C.5 states, "[e]rosion and sedimentation controls shall be designed in accordance with the Virginia Erosion and Sediment Control Handbook, Third Edition, 1992 . . .. These controls shall be placed prior to clearing and grading and maintained in good working order to minimize impacts to state waters. These controls shall remain in place until the area is stabilized and shall then be removed."

      §62.1-44.15:20 (A) states, "[e]xcept in compliance with an individual or general Virginia Water Protection Permit issued in accordance with this article, it shall be unlawful to: 1. Excavate in a wetland; 2. On or after October 1, 2001, conduct the following in a wetland: a. New activities to cause draining that significantly alters or degrades existing wetland acreage or functions; b. Filling or dumping; c. Permanent flooding or impounding; or d. New activities that cause significant alteration or degradation of existing wetland acreage or functions; or 3. Alter the physical,

chemical, or biological properties of state waters and make them detrimental to the public health, animal or aquatic life, or to the uses of such waters for domestic or industrial consumption, or for recreation, or for other uses unless authorized by a certificate issued by the Board.

9 VAC 25-210-50 (A) states, "[e]xcept in compliance with a VWP permit, unless the activity is otherwise exempted or excluded, no person shall dredge, fill or discharge any pollutant into, or adjacent to surface waters, withdraw surface water, otherwise alter the physical, chemical or biological properties of surface waters and make them detrimental to the public health, or to animal or aquatic life, or to the uses of such waters for domestic or industrial consumption, or for recreation, or for other uses; excavate in wetlands or on or after October 1, 2001, conduct the following activities in a wetland: 1. New activities to cause draining that significantly alters or degrades existing wetland acreage or functions; 2. Filling or dumping; 3. Permanent flooding or impounding; or 4. New activities that cause significant alteration or degradation of existing wetland acreage or functions.

b) There was no flagging of the non-impacted surface waters within 50 feet of any of the permitted activities on the Property. Lack of flagging resulted in unpermitted impacts by clearing and grubbing adjacent to impact area one and impact area two. Unpermitted impacts totaled 0 .008 acres of forested wetland and 44 linear feet of stream channel at impact area one and 35 linear feet of stream channel at impact area two.

VWP Permit WP4-12-1632 Part I. C.10 states, "[a]ll nonimpacted surface waters and compensatory mitigation areas within 50 feet of permitted activities and within the project or right-of-way limits shall be clearly flagged or marked for the life of the construction activity at that location to preclude unauthorized disturbances to these surface waters and compensatory mitigation areas during construction. The permittee shall notify contractors that no activities are to occur in these marked surface waters."

§62.1-44.15:20 (A) states, "[e]xcept in compliance with an individual or general Virginia Water Protection Permit issued in accordance with this article, it shall be unlawful to: 1. Excavate in a wetland; 2. On or after October 1, 2001, conduct the following in a wetland: a. New activities to cause draining that significantly alters or degrades existing wetland acreage or functions; b. Filling or dumping; c. Permanent flooding or impounding; or d. New activities that cause significant alteration or degradation of existing wetland acreage or functions; or 3. Alter the physical, chemical, or biological properties of state waters and make them detrimental to the public health, animal or aquatic life, or to the uses of such waters for domestic or industrial consumption, or for recreation, or for other uses unless authorized by a certificate issued by the Board."

9 VAC 25-210-50 (A) states, "[e]xcept in compliance with a VWP permit, unless the activity is otherwise exempted or excluded, no person shall dredge, fill or discharge

any pollutant into, or adjacent to surface waters, withdraw surface water, otherwise alter the physical, chemical or biological properties of surface waters and make them detrimental to the public health, or to animal or aquatic life, or to the uses of such waters for domestic or industrial consumption, or for recreation, or for other uses; excavate in wetlands or on or after October 1, 2001, conduct the following activities in a wetland: 1. New activities to cause draining that significantly alters or degrades existing wetland acreage or functions; 2. Filling or dumping; 3. Permanent flooding or impounding; or 4. New activities that cause significant alteration or degradation of existing wetland acreage or functions.

4. On August 16, 2013, DEQ issued NOV No. 13-08-PRO-702 to Centerpointe for the violations described in paragraph C(3) above.

5. On August 27, 2013, DEQ staff met with representatives of Centerpointe to discuss the violations.

6. On October 18, 2013, DEQ staff conducted a site visit at the Property and confirmed that Centerpointe is now in compliance with the Permit

7. Based on the results of the site inspections, review of the Permit file, and the August 27, 2013, meeting, the Board concludes that Centerpointe has violated the Permit conditions listed above, Va. Code § 62.1-44.15:20(A) and 9 VAC 25-210-50(A) as described above.
