Subject: Dominion VA Power's proposed Front Royal Power Plant

Please make a review of the Dominion VA Power's proposed Front Royal Power Plant. I am a farmer and live and farm in Sperryville VA, just on the edge of the Shenandoah National Park. I am very concerned about the impact of this plant on the quality of air and the environment in our immediate area which includes the park and the North and central Piedmont area. I produce healthy, grass fed and finished beef and lamb and pastured pork and any degradation of the air will certainly hurt my and others ability to grow healthy products.

My farm is Mount Vernon Farm and you can learn about our farming practices from our website, [www.mountvernonfarm.net](http://www.mountvernonfarm.net). We are also just opening a Bed and Breakfast in our 1827 farm house built by my great, great grandfather. The smog and air quality degradation will cause us and other tourist businesses significant economic hardship.

Thank you for your consideration.
