Subject: Proposed gas plant in Front Royal

As if the desecration of the Piedmont region by Dominion's huge new power line isn't enough, now Dominion wants to expand a plant that they bought to take off the table during the power line controversy. What a conceit.

Where is the demand for this additional power or is Dominion pushing the envelope just because they think they can get away with it? Brazen!

The proposed tripling of the previously approved plant should be carefully reviewed for its impact on the community and nearby Shenandoah National Park.

Please do not act in haste. The scale of this proposed plant should be examined in a thorough and thoughtful manner.

Yours sincerely,

Helen DuBois
