

November 22, 2010

Janardan R. Pandey, P.E.
Air Permit Manager
Virginia Dept. of Environmental Quality – VRO

Dear Mr. Pandey,

This letter serves as a follow-up to the Public Hearing held November 9th, 2010 in regards to a proposed natural gas-fired, combined-cycle power station in the Kelly Industrial Park in Warren County.

The Economic Development Authority (EDA) is very much in favor of having this plant located in Warren County. Not only will it be a boost to the local economy during the construction phase, but it will bring more than \$2 million in tax revenue per year to the community.

The EDA also feels very comfortable that Dominion Virginia Power is doing everything possible to make sure this plant does not impact the environment in a negative way.

Sincerely,

Jennifer R. McDonald
Executive Director
