**To:** Riggleman, Anita (DEQ)  
**Subject:** Gas-fired power plant/Front Royal-Warren County, VA  
Dear Ms. Riggleman,

I respectfully request that the State Air Pollution Control Board review the anticipated impact this power plant will impose not only on the Shenandoah National Park but the Shenandoah Valley as a whole. While it has been stated that the demand for electricity will increase in the future, we must provide for that demand with clean energy methods and stop dumping toxic emissions into our air by burning more and more coal and gas.

It would be simply astonishing if a Virginia, or even better, a Front Royal/Warren County-based energy project would look forward to the needs of the future and construct an energy-producing plant that will move our next generations toward a more sustainable planet. If we continue with business as usual, the environment future generations will inherit may not be worth inheriting at all.

Sincerely,

Ms. Kaycee D. Lichliter
