Dear Madam,

I am opposed to the Dominion power facility in the Shenandoah Valley near Front Royal in Warren County. As a resident of Warren County since 1997, I have noticed the continued deterioration of air quality and fewer "clear days" over the valley, so any additional plants will only further acerbate the quality.

We were promised (by President Bush) that his "Clean Skies Act," a misnomer, would help the Valley, but in fact, it has been the opposite, perpetuating one of the biggest con jobs of the American public.

We cannot afford more plants unless there is strict adherence to clean air and not just promises.

Sincerely,

William Waybourn
