

## Virginia Native Plants Marketing Programs and Resources

*This directory is being provided by the **Virginia Native Plant Marketing Partnership (VNPMP)**. Please note that this directory will be updated as frequently as possible and it is possible that it will not reflect new efforts and project updates – please contact partners directly with any questions.)*

### **Virginia Native Plants Marketing Partnership:**

<http://www.deq.virginia.gov/Programs/CoastalZoneManagement/CZMIssuesInitiatives/NativePlants.aspx> . (contact: Virginia Witmer, Virginia CZM Program Outreach Coordinator - [Virginia.Witmer@deq.virginia.gov](mailto:Virginia.Witmer@deq.virginia.gov))

The **Virginia Native Plant Marketing Partnership (VNPMP)** is a forum for partners engaged in native plant marketing efforts on a state, regional and local level to collaborate and coordinate, leading to more consistent messaging to the general public and greater efficiencies in the use of limited resources. It was in the spirit of expanding and informing a broader partnership that the Virginia CZM Program and the Department of Game and Inland Fisheries - one of the program's network partner agencies – hosted, in May 2013, a Virginia Native Plants Marketing Partnership Forum - ***Increasing the Use of Virginia Native Plants: Social Marketing, Collaboration and Coordination*** - and a second Forum in January 2014 - ***Growing Our Community and Cultivating Our Ideas***.

The members of the VNPMP have identified collaborative projects that will be more effectively and efficiently addressed and supported through the partnership. In August 2013, a VNPMP Steering Team, based on feedback from the May 2013 forum, prioritized the following goals:

1. *Development of a Virginia conservation landscaping certification*
2. *Development of a framework and guidelines for native plant seed collection/propagation*
3. *Development of a collaborative web-based site to support the partnership and a centralized website for Virginia native plant information and resources – a hub that would link to partner sites and other pages*
4. *Development of a state-wide native plant marketing campaign*

## Virginia CZM Program:

- <http://www.deq.virginia.gov/Programs/CoastalZoneManagement.aspx> (contact: Laura McKay, Program Manager – [Laura.McKay@deq.virginia.gov](mailto:Laura.McKay@deq.virginia.gov) and Virginia Witmer, Virginia CZM Program Outreach Coordinator - [Virginia.Witmer@deq.virginia.gov](mailto:Virginia.Witmer@deq.virginia.gov))

### **Coastal Regional Native Plants Campaigns -**

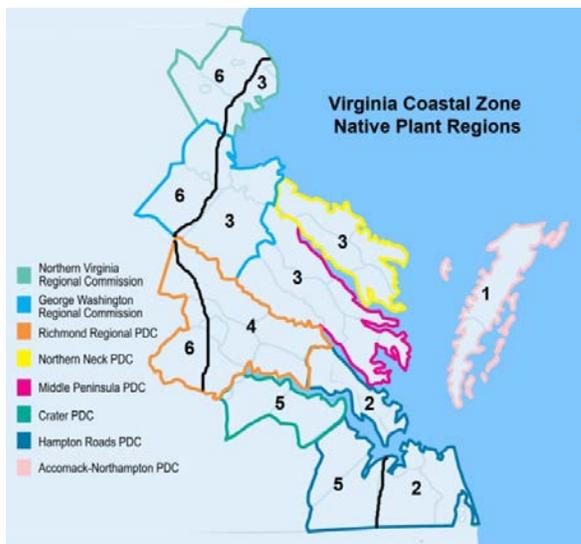

Virginia CZM launched the **Plant ES Natives - They're Shore Beautiful!** campaign in April 2009 in Accomack and Northampton Counties, using a community-based social marketing approach. The campaign is going beyond awareness to change individual behavior and establish a social norm for use of native plants. The campaign was designed after listening to Eastern Shore residents and identifying the barriers that were inhibiting their planting of natives, the benefits they would receive by increasing their use of natives, and the outlets through which they receive information. The campaign then selected methods that would most effectively convey the campaign message – “They're Shore Beautiful!” - to this audience. The campaign strategy uses social marketing tools and techniques that are proven and that focus on making planting natives fun, easy and popular. A colorful guide to Eastern Shore native plants makes it easier for residents to identify native plants, and a series of noticeable, eye-catching, self-explanatory prompts at point of sale makes it easier to find them. Native plant demonstration gardens follow the rule that seeing is believing and showcase the beauty of Eastern Shore native plants. Most importantly, leaders in the community are helping make planting natives more popular. A report on the campaign website outlines the campaign's research, SM techniques and multi-media package, status and cost of all facets of the campaign, and mid-campaign evaluation and results -

<http://www.deq.virginia.gov/Programs/CoastalZoneManagement/CZMIssuesInitiatives/NativePlants/PlantESNatives.aspx>. Facebook - <http://www.facebook.com/pages/Plant-ES-Natives/148082101925811?sk=photos>.

The **Plant ES Natives** campaign social marketing strategy has been a model for development of other regional campaigns funded by Virginia CZM, guided by local research. The Northern Neck's **Plant NNK Natives: Go Native, Grow Native** (<http://vnps.org/northernneck/go-native-grow-native/>) is in full swing, and Northern Virginia's **Plant NoVA Natives: Naturally Beautiful** campaign will be piloted this fall 2014

and fully implemented in spring 2015. Pre-campaign partner engagement and research for a regional campaign in Hampton Roads is underway.

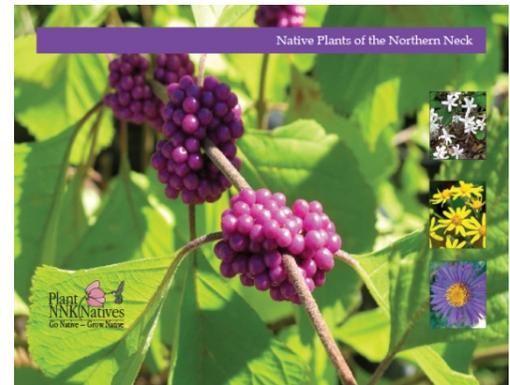

Ultimately, the Virginia CZM Program hopes to have a campaign in every coastal planting region - see map at left showing regions delineated by DCR Natural Heritage. The campaigns are visibly linked through their names and shared design elements in their campaign logos, and programmatically linked as they share their progress and experiences. Many of the same organizations are participating on the regional campaign planning teams, including local chapters of the Virginia Native Plant Society, Master Gardeners, Master Naturalists, Audubon and Virginia Soil and Water Conservation Districts. Elements of

the Plant ES Natives Campaign strategy - such as a regional plant guide (based on the Flora of Virginia) and garden center plant tags, have been easily transferrable to address barriers common in all the regions to planting natives. Each region however is unique and the planning teams have adopted and are continuously evaluating which place-based approaches have been most effective in reaching their gardening population.

The *Plant ES Natives* campaign is being coordinated by the Virginia CZM Program; the *Plant NNK Natives* campaign by the Northern Neck Chapter of the Native Plant Society through a Virginia CZM grant to the Northern Neck PDC; and, the *Plant NoVA Natives* campaign by the Northern Virginia Regional Commission. The Hampton Roads Planning District Commission is leading development of the campaign in that region.

Contact the *Plant NNK Natives* Campaign Coordinator, Janet Pawlukiewicz (NNK Chapter of the Virginia Native Plant Society) at [flickerhill@earthlink.net](mailto:flickerhill@earthlink.net). For more details on the *Plant NoVA Natives* campaign contact, Corey Miles, NV Regional Commission, at [cmiles@novaregion.org](mailto:cmiles@novaregion.org).

**Piedmont Native Plant Initiative** – (contact: Lonnie Murray; Thomas Jefferson SWCD, board member; Albemarle Natural Heritage Committee - [murray4albemarle@gmail.com](mailto:murray4albemarle@gmail.com) and Repp Glaettli, Water Resource Specialist, Albemarle Co. Dept. General Services- [rqlaettli@albemarle.org](mailto:rqlaettli@albemarle.org). This initiative has developed a local native plants database for the Charlottesville/Albemarle region - <http://www.albemarle.org/nativeplants/>.

### **Department of Conservation and Recreation:**

<http://plantmoreplants.com/> – (contacts: Gary Waugh/Julie Buchanan – [Gary.Waugh@dcr.virginia.gov](mailto:Gary.Waugh@dcr.virginia.gov), [Julie.Buchanan@dcr.virginia.gov](mailto:Julie.Buchanan@dcr.virginia.gov)) Launched in 2011 with partners in the Richmond, Baltimore, D.C.

Metro area and Hampton Roads region, the *Plant More Plants* Campaign is a successor to EPA Bay Program Chesapeake Club Campaign and is focused on increasing plant use among homeowners to mitigate storm water run-off and erosion and help improve the health of the Bay. The website includes planting plans, such as rain gardens. The campaign is not strictly focused on the use of native plants but does encourage their use and discourages the use of invasive non-natives. The campaign is currently in partnership with over 36 retail garden centers and 40 landscapers. The campaign includes the use of social media – facebook, a blog and Twitter - <http://www.facebook.com/plantmoreplants>.

Division of Natural Heritage - completed an update of the coastal plain and mountain versions of the brochure *Native Plants for Conservation, Restoration and Landscaping* -

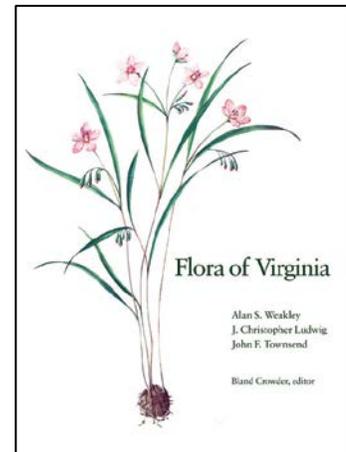

[http://www.dcr.virginia.gov/natural\\_heritage/nativeplants.shtml](http://www.dcr.virginia.gov/natural_heritage/nativeplants.shtml) developed by DCR with the Virginia Native Plant Society. Also check out the *Virginia Native Plant Finder*:

[http://dcr.virginia.gov/natural\\_heritage/np.shtml](http://dcr.virginia.gov/natural_heritage/np.shtml). This database uses plant lists from *Native Plants for Conservation, Restoration and Landscaping brochure series*. It also works nicely on a smartphone!

### **Flora of Virginia Project:**

<http://floraofvirginia.org/index.shtml> (contacts: Bland Crowder/Chris Ludwig - Bland Crowder@dcr.virginia.gov, Chris.Ludwig@dcr.virginia.gov) A 1,400-page, state-of-the-art manual describing and aiding in the identification of 3,500 taxa of plants native to Virginia or naturalized here, including 1500 new native plant illustrations, published in November of 2012. It is the first flora since *Flora Virginica* was produced in the mid-1700s. All information in the Flora will be available on-line Digital Atlas of Virginia Flora [http://www.biol.vt.edu/digital\\_atlas/](http://www.biol.vt.edu/digital_atlas/) - a partnership with Virginia Botanical Associates and Virginia Tech. Users can search for species by county on the atlas website and DCR Natural Heritage staff is currently contributing photographs to the atlas. In response to the public's penchant for all things digital, the Flora is planning to release an app for i-Phones and i-Pads. Partners in the Flora Project include DCR, the Virginia Native Plant Society, National Academy of Science, Virginia Botanical Associates, and Lewis Ginter Botanical Garden. The Flora Project and the Library of Virginia are designing a major exhibition at the Library that will run from March to September 2014 titled "The Flora of Virginia." It will feature early botanical works, illustrations, herbarium specimens, and illustrations and sculptures, some done just for the exhibition.

### **Department of Game and Inland Fisheries:**

DGIF's efforts focus on enhancing wildlife habitat. (contact: Carol Heiser – [Carol.Heiser@dgif.virginia.gov](mailto:Carol.Heiser@dgif.virginia.gov)). The *Habitat Partners®* program - <http://www.dgif.virginia.gov/habitat/> - encourages corporate landowners, private landowners, schools and homeowners to improve habitat in their community that will benefit Virginia's songbirds, mammals, amphibians and other wildlife. It includes the *Corporate Habitat Program*, the *Habitat at Home Program* and *Schoolyard Habitat Program*. Reaching out to those who can make a big impact and reach many people by setting a good example, including land-use decision-makers and large landowners – business, corporations, schools, etc. Recently focused on partnerships with the Science Museum, Capital One, and Randolph Macon College. Carol serves on the *Chesapeake Conservation Landscaping Council (CCLC)*.

### **Wetlands Watch:**

<http://wetlandswatch.org/default.asp> - (contact - Shereen Hughes - [Shereen.hughes@wetlandswatch.org](mailto:Shereen.hughes@wetlandswatch.org)) Wetlands Watch promotes the use of conservation landscaping (including the use of native plants) and other integrated shoreline best management practices (BMPs) like native plant buffers, wetlands protection and restoration, and living shorelines. They've focused on changing personal land-use behavior (through education and social marketing), working to increase the availability of native plants as well as consistently trained and certified conservation landscaping professionals in the marketplace. For the past two years, they've promoted the increased use of conservation landscaping type stormwater BMPs on private property as TMDL/Watershed Implementation Plan and MS4 permit strategies for local government. In 2013, Shereen spoke on

conservation landscaping at the Mid-Atlantic Horticultural Short Course and co-hosted “A Collaborative Summit – Protecting Water Quality through Actions on Urban-Suburban Properties” to bring together a very diverse audience engaged in efforts to increase the use of actions on private property that protect water quality and restore watersheds and habitats in Virginia's urban-suburban communities. Wetlands Watch has set up the “Collaborative Connection” on the Chesapeake Network to keep Summit participants networked and continue Summit-related discussions and ideas including ideas to increase the use of native plants. Wetlands Watch also is a Chesapeake *RiverWise* Communities partner.

**Alliance for the Chesapeake Bay:**

Chesapeake Native Plant Center – <http://nativeplantcenter.net/> (contact: Nissa Dean - [ndeans@allianceforthebay.org](mailto:ndeans@allianceforthebay.org) ) The ACB - <https://allianceforthebay.org> - partnered with USFWS to launch the web-based version of the *Native Plants for Wildlife Habitat and Conservation Landscaping: Chesapeake Bay Watershed*. Website was recently enhanced. Currently coordinating the *Greening*

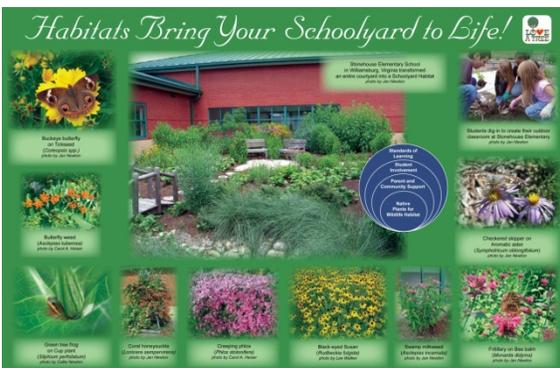

*Virginia's Capitol* initiative to retrofit the grounds and Richmond streets and alleys to reduce polluted runoff to the James River and Chesapeake Bay. The ACB co-hosted the Collaborative Summit with Wetlands Watch, VIMS, and UVA IEN and used the results of the Summit to inform a new model green infrastructure/stormwater retrofit program - Chesapeake *RiverWise* Communities – which is under development. The

**RiverWise** Program provides tools and resources to incentivize and enable citizens and businesses to reduce stormwater runoff by making important changes to how they manage their properties, including the installation of BMPs such as rain barrels, rain gardens, permeable pavement and the planting of trees.

**Department of Environmental Quality - Division of Public Outreach and Communications:**

(contact: Ann Regn – [Ann.Regn@deg.virginia.gov](mailto:Ann.Regn@deg.virginia.gov)) DEQ's Division of Public Outreach and Communications staff was instrumental in facilitation and planning for the Virginia CZM Program's first regional native plant social marketing campaign – Plant ES Natives, and facilitated the May 3 forum -

*Virginia Native Plants Social Marketing, Coordination and Collaboration*. Ann Regn also guided development of the 2011 *Love-A-Tree Module: Habitats Bring Your Schoolyard to Life!* –

<http://www.deq.state.va.us/education/loveatree.html>

- This environmental education module, sponsored by International Paper, pulls together resources from numerous partners centered on a single theme, to help teachers meet Virginia's Standards for Learning. The theme for this year's kit is native plants and focuses on how teachers and schools can create and use schoolyard habitats. Chris Ludwig, DCR-NH has

provided a plant list suitable for state-wide use to distribute in the kit. Ann Regn also is helping to develop an environmental education literacy plan for the Chesapeake Bay region. The Governor's Office is very interested in creating a new “green schools certificate program” (modeled after the existing “Virginia Naturally Schools” program) to help Virginia meet the environmental literacy goals of the 2009 Chesapeake Bay Executive Order. This green schools certificate program would include a native plant schoolyard habitat component.

### **Virginia Native Plant Society:**

<http://vnps.org/chapters> - (contact: Nancy Vehrs, President - [nvehrs1@yahoo.com](mailto:nvehrs1@yahoo.com) ). A grassroots organization with numerous chapters across the state. Northern Neck Chapter is coordinating the *Plant NNK Natives* campaign, funded by the Virginia CZM Program through the Northern Neck Planning District Commission.

### **Chesapeake Bay Foundation:**

(contact: Chuck Epes, Assistant Director of Media Relations - [CEpes@cbf.org](mailto:CEpes@cbf.org)) CBF does not have an active native plant program, but promotes their use as bay-friendly/eco-friendly plants of choice. CBF exclusively uses native plants for their restoration work (stream buffers, wetland restoration, living shorelines, etc.), and they encourage natives in their "Gardeners for the Bay" promotions (which is not really a program as much as a way to outreach, engage, and educate another group of constituents) - <http://www.cbf.org/landscaping>.

### **Chesapeake Conservation Landscaping Council:**

<http://www.chesapeakelandscaping.org/> - (contact: Christin Jolicoeur, president - [cjolicoeur@arlingtonva.us](mailto:cjolicoeur@arlingtonva.us)) The CCLC has laid out eight essential elements of conservation landscaping, which they have set as a standard for landscape designers. (Landscape designers partnering in the Plant More Plants campaign must adhere to these principles.) The Council needs more active partners and Virginia needs to be more involved. The Council hosts an annual conference - Turning a New Leaf – in December. The Council is spearheading an effort to develop a Chesapeake Conservation Landscaping Certification Program, and has sought funding from NFWF to initiate this project first in Maryland and eventually Bay-wide.

### **Master Gardeners:**

<http://www.hort.vt.edu/mastergardener/> - (contact: David Close, State Coordinator - [dclose@vt.edu](mailto:dclose@vt.edu) ) Virginia Cooperative Extension Master Gardeners (VCE-MGs) are volunteers with Virginia Cooperative Extension dedicated to working with the community to encourage and promote environmentally sound horticulture practices through sustainable landscape management educational programs. VCE-MGs provide communities with locally identified programs, including answers to individual questions via: hotlines and plant clinics; radio, newspaper, and computer links; educational programs to meet targeted needs, such as the establishment of community gardens for low income and elderly persons; education for the preservation of historic landscapes; urban tree planting programs; and guidance in making the natural environment accessible to all residents regardless of disabilities, incomes, or where they live. Virginia Master Gardeners have been active partners in the Virginia CZM Program's regional native plant campaigns.

### **Master Naturalists:**

<http://www.virginiamasternaturalist.org/> - (contact – Alycia Crall, State Coordinator - [acrall@vt.edu](mailto:acrall@vt.edu)) Virginia Master Naturalists are volunteer educators, citizen scientists, and stewards helping Virginia conserve and manage natural resources and public lands. The process for becoming a certified Virginia Master Naturalist typically takes 6 to 12 months. One starts by completing a 40-hour basic training course offered by a local chapter of the program. An additional 8 hours of advanced training are also required. An important part of the certification process is the required 40 hours

of volunteer service. Chapters are in development across Virginia. In an area where there is no existing chapter, several interested people and an advisor from a sponsoring agency can start their own. The Virginia Master Naturalist Program is jointly sponsored by Virginia Cooperative Extension, Virginia Department of Conservation and Recreation, Virginia Department of Environmental Quality, Virginia Department of Forestry, Virginia Department of Game and Inland Fisheries, and Virginia Museum of Natural History. It is based in the Department of Forest Resources and Environmental Conservation within the College of Natural Resources and Environment at Virginia Tech. Virginia Master Naturalists have been active partners in the Virginia CZM Program's regional native plant campaigns.

### **Virginia Nursery and Landscape Association –**

(contacts: Virginia Rockwell, representative, landscape designer, horticulturist - [Virginia@GentleGardener.com](mailto:Virginia@GentleGardener.com) and Tom Thompson, representative, landscape designer - [naturalartlandscaping@yahoo.com](mailto:naturalartlandscaping@yahoo.com). VNLA produces an annual *Guide to Virginia Growers* – flip-page version online [http://issuu.com/hortman48/docs/2013growersguide\\_p2](http://issuu.com/hortman48/docs/2013growersguide_p2) or use search feature at

<http://www.vnla.org/GrowerGuide/tabid/7080/Default.aspx> . In the 2014 *Guide to Virginia Growers*, the Virginia Nursery and Landscaper Association, a member of the VNPMP Steering Team, has highlighted the availability of plants that are native to the Chesapeake Bay region (according to the USFWS Chesapeake Bay native plant database). The guide also includes ads for the Flora of Virginia and an ad outlining the habitat value of natives. The guide will help the VNPMP reach growers, landscape architects and designers, and contractors and is a great first step in highlighting and increasing the wholesale availability and distribution of Virginia natives.

### **Virginia Soil and Water Conservation Districts:**

[http://www.dcr.virginia.gov/stormwater\\_management/swcds.shtml](http://www.dcr.virginia.gov/stormwater_management/swcds.shtml) and Virginia Association of Soil and Water Conservation Districts - <http://vaswcd.org/> (contact: Beth Sokolik, Education & Training Coordinator, VA Assn. of Soil & Water Conservation Districts - [elizabeth.sokolik@vaswcd.org](mailto:elizabeth.sokolik@vaswcd.org) ) Local soil and water conservation districts have been active partners in the Virginia CZM Program's regional native plant campaigns.

### **Lewis Ginter Botanical Garden:**

<http://www.lewisginter.org/> - (contact – Jay Austin, LGBG Horticulturist, [jaya@lewisginter.org](mailto:jaya@lewisginter.org)) Lewis Ginter Botanical Garden [www.lewisginter.org](http://www.lewisginter.org) is an 80-acre non-profit botanical garden located in Richmond, Virginia. The Garden serves the increasingly urbanized community as a place of natural beauty and environmental education. The Garden's mission is to enlighten and inspire its constituents through its outstanding botanical collections, horticultural displays and landscape design. The Garden engages its constituents with the natural world through interpretation, programs, educational resources and outreach, and advocates for sustainability and stewardship of our planet. The plant specimens in its collections offer combinations of new, unusual, interesting, native, exotic, or rare plants in beautiful, creative, and sustainably managed settings. The Vienna Cobb Anderson Meadow contains approximately 100 native species displayed in a naturalistic setting. The Garden's Living Collections Policy (2012) states an ongoing commitment to improving its native plant collection, using *The Flora of Virginia* (2012) as the guiding text for a synoptic collection. The Hydrologic Master Plan for the Garden includes developing a native plant garden in the future that will demonstrate design practices which treat water as a critical and valuable resource.

**Virginia Institute of Marine Science:**

<http://ccrm.vims.edu/livingshorelines/> (contact: Karen Duhring, Center for Coastal Resources Management- [karend@vims.edu](mailto:karend@vims.edu)) Living Shorelines are restored shorelines that, in addition to protecting property from erosion, provide habitat for fish, birds and other wildlife. Like undisturbed natural shorelines, they also protect water quality by trapping excess nutrients and sediment. The Virginia CZM Program Office has working with the program's partners, including VIMS, to promote Living Shorelines. This initiative uses native plants to re-vegetate the shoreline.

**Virginia Tech:**

(contact: Lisa Lipsey, Beautiful Gardens Program Coordinator - [llipsey@vt.edu](mailto:llipsey@vt.edu)) The VLNA Beautiful Gardens Program is a collaborative effort of Virginia Department of Agriculture and Consumer Services (VDACS), Virginia Nurserymen's Association Horticulture Research Foundation (VNAHRF), and Virginia Polytechnic Institute and State University with partial funding from VNLA. One of the stated goals of the program is to make

available to the buying public a dependable source of native plants under an established, quality, name brand that will provide expanded and profitable production opportunities and marketing for existing and new Virginia ornamental plants producers.

**Green Infrastructure Center:**

<http://gicinc.org/> (contact: Karen Firehock, Executive Director - [firehock@gicinc.org](mailto:firehock@gicinc.org)) Mission is to assist communities in developing strategies for protecting and conserving their ecological and cultural assets through environmentally-sensitive decisions, lifestyles and planning. Green infrastructure planning entails inventorying green assets, ensuring habitats are connected, and identifying opportunities for their protection and/or restoration, and developing a coordinated strategy to channel development and redevelopment to the most appropriate locations.

**Virginia Department of Forestry:**

<http://www.dof.virginia.gov/> (contact: Ellen Powell, [Ellen.Powell@dof.virginia.gov](mailto:Ellen.Powell@dof.virginia.gov))
