1. Delta Star, Inc. owns and operates the Facility in Lynchburg City, Virginia. The Facility is a medium power transformer and industrial products manufacturing facility.
2. The Facility is the subject of the Permit which allows the Facility to operate a medium power transformer and industrial products manufacturing facility.
3. On June 30, 2010, Department staff conducted a Full Compliance Evaluation of the Facility for compliance with the requirements of the Virginia Air Pollution Control Law, the Permit, and the Regulations. Based on the inspection and follow-up information, Department staff made the following observations:
 - a. The Facility coating operation records were available on a daily basis but not on a monthly or rolling twelve month basis. In addition, the Facility was unable to provide any records of VOC or HAP emissions from the coating operation.
 - b. The Facility has not submitted the 2009 Annual Update report. The report was due to DEQ by April 15, 2010.
4. Condition 11 of the Facility’s September 25, 2002, State Operating Permit states that:

“On Site Records – The permittee shall maintain records of emission data and operating parameters as necessary to demonstrate compliance with this permit. The content and format of such records shall be arranged with the South Central Regional Office. These records shall include, but are not limited to:

- a. Monthly and annual throughput (in gallons) from the coating operation including clean-up. Annual throughput shall be calculated monthly as the sum of each consecutive 12 month period.
- b. Monthly and annual VOC emissions (in pounds) from the coating operation including clean-up. Annual emissions shall be calculated monthly as the sum of each consecutive 12 month period.
- c. Material Safety Data Sheets (MSDS) or other vendor information as approved by DEQ showing VOC content, HAP content, water content, and solids content for each coating used.
- d. Monthly and annual HAP emissions to verify compliance with the individual and total HAP emissions limitations in Condition 6. Annual emissions shall be calculated monthly as the sum of each consecutive 12 month period.

These records shall be available for inspection by the DEQ and shall be current for the most recent five years.

(9 VAC 5-80-900)”

5. Condition 21 of the Facility’s September 25, 2002, State Operating Permit states that:

“Registration/Update – Annual requirements to fulfill legal obligations to maintain current stationary source emissions data will necessitate a prompt response by the permittee to requests by the DEQ or the Board for information to include, as appropriate: process and production; changes in control equipment; and operating schedules. Such requests for information from the DEQ will either be in writing or by personal contact. The availability of information submitted to the DEQ or the Board will be governed by applicable provisions of the Freedom of Information Act, §§ 2.1-340 through 2.1-348 of the Code of Virginia, § 10.1-1314 (addressing information provided by the Board) of the Code of Virginia, and 9 VAC 5-170-60 of the State Air Pollution Control Board Regulations. Information provided to federal officials is subject to appropriate federal law and regulations governing confidentiality of such information.

(9 VAC 5-80-900)”

6. On July 27, 2010, based on the inspection and follow-up information, the Department issued Notice of Violation AWCRO7645 to Delta Star, Inc. for the violations described in paragraphs C(3) through C(5), above.
7. On August 6, 2010, Department staff met with representatives of Delta Star, Inc. to discuss the violations.

6. Failure by Delta Star, Inc. to comply with any of the terms of this Order shall constitute a violation of an order of the Board. Nothing herein shall waive the initiation of appropriate enforcement actions or the issuance of additional orders as appropriate by the Board or the Director as a result of such violations.
