SECTION C: Findings of Fact and Conclusions of Law

1. Watermark owns in part and developed the Property in Chesterfield County, Virginia.
2. On October 11, 2007, DEQ issued the Permit to Watermark for wetland impacts associated with the development of Watermark Subdivision. The Permit was extended on August 20, 2013, and expires on October 10, 2018.
3. On April 23, 2013, DEQ staff conducted an inspection at the Property and a file review. DEQ staff inspected the Property for compliance with the requirements of the State Water Control Law, the Regulations and compliance with the Permit. The DEQ inspector observed the following:
 - a) A rock check dam had been constructed within state waters below impact O. The check dam was observed to be 8 feet long, 7 feet wide and 4 feet deep. The permit did not authorize this impact to state waters, and DEQ did not receive notice of additional temporary impacts.

9 VAC 25-210-180 F(8) states, "[a] modification is not required subsequent to issuance for additional temporary impacts to surface waters, provided DEQ is notified in writing regarding additional temporary impacts, and the area is restored to preexisting conditions."

§62.1-44.15:20 (A) states, "[e]xcept in compliance with an individual or general Virginia Water Protection Permit issued in accordance with this article, it shall be unlawful to: 1. Excavate in a wetland; 2. On or after October 1, 2001, conduct the following in a wetland: a. New activities to cause draining that significantly alters or degrades existing wetland acreage or functions; b. Filling or dumping; c. Permanent flooding or impounding; or d. New activities that cause significant alteration or degradation of existing wetland acreage or functions; or 3. Alter the physical,

chemical, or biological properties of state waters and make them detrimental to the public health, animal or aquatic life, or to the uses of such waters for domestic or industrial consumption, or for recreation, or for other uses unless authorized by a certificate issued by the Board.

9 VAC 25-210-50 (A) states, “[e]xcept in compliance with a VWP permit, unless the activity is otherwise exempted or excluded, no person shall dredge, fill or discharge any pollutant into, or adjacent to surface waters, withdraw surface water, otherwise alter the physical, chemical or biological properties of surface waters and make them detrimental to the public health, or to animal or aquatic life, or to the uses of such waters for domestic or industrial consumption, or for recreation, or for other uses; excavate in wetlands or on or after October 1, 2001, conduct the following activities in a wetland: 1. New activities to cause draining that significantly alters or degrades existing wetland acreage or functions; 2. Filling or dumping; 3. Permanent flooding or impounding; or 4. New activities that cause significant alteration or degradation of existing wetland acreage or functions.

- b) Sediment was observed in the wetland headwaters of Watermark Lake in an area not authorized for impact, at the outfall of a stormwater conveyance channel between impacts “A” and “S.”

§62.1-44.15:20 (A) states, “[e]xcept in compliance with an individual or general Virginia Water Protection Permit issued in accordance with this article, it shall be unlawful to: 1. Excavate in a wetland; 2. On or after October 1, 2001, conduct the following in a wetland: a. New activities to cause draining that significantly alters or degrades existing wetland acreage or functions; b. Filling or dumping; c. Permanent flooding or impounding; or d. New activities that cause significant alteration or degradation of existing wetland acreage or functions; or 3. Alter the physical, chemical, or biological properties of state waters and make them detrimental to the public health, animal or aquatic life, or to the uses of such waters for domestic or industrial consumption, or for recreation, or for other uses unless authorized by a certificate issued by the Board.

9 VAC 25-210-50 (A) states, “[e]xcept in compliance with a VWP permit, unless the activity is otherwise exempted or excluded, no person shall dredge, fill or discharge any pollutant into, or adjacent to surface waters, withdraw surface water, otherwise alter the physical, chemical or biological properties of surface waters and make them detrimental to the public health, or to animal or aquatic life, or to the uses of such waters for domestic or industrial consumption, or for recreation, or for other uses; excavate in wetlands or on or after October 1, 2001, conduct the following activities in a wetland: 1. New activities to cause draining that significantly alters or degrades existing wetland acreage or functions; 2. Filling or dumping; 3. Permanent flooding or impounding; or 4. New activities that cause significant alteration or degradation of existing wetland acreage or functions.

- c) Erosion and sediment controls at impact area “D” were failing and allowing sediment to escape containment.

VWP Permit 06-2855 Part I.C.24 states “[e]rosion and sedimentation controls shall be designed in accordance with the Virginia Erosion and Sediment Control Handbook, Third Edition, 1992 These controls shall be placed prior to clearing and grading activities and shall be maintained in good working order, to minimize impacts to surface waters. These controls shall remain in place only until clearing and grading activities cease and these areas have been stabilized.”

§62.1-44.15:20 (A) states, “[e]xcept in compliance with an individual or general Virginia Water Protection Permit issued in accordance with this article, it shall be unlawful to: 1. Excavate in a wetland; 2. On or after October 1, 2001, conduct the following in a wetland: a. New activities to cause draining that significantly alters or degrades existing wetland acreage or functions; b. Filling or dumping; c. Permanent flooding or impounding; or d. New activities that cause significant alteration or degradation of existing wetland acreage or functions; or 3. Alter the physical, chemical, or biological properties of state waters and make them detrimental to the public health, animal or aquatic life, or to the uses of such waters for domestic or industrial consumption, or for recreation, or for other uses unless authorized by a certificate issued by the Board.

9 VAC 25-210-50 (A) states, “[e]xcept in compliance with a VWP permit, unless the activity is otherwise exempted or excluded, no person shall dredge, fill or discharge any pollutant into, or adjacent to surface waters, withdraw surface water, otherwise alter the physical, chemical or biological properties of surface waters and make them detrimental to the public health, or to animal or aquatic life, or to the uses of such waters for domestic or industrial consumption, or for recreation, or for other uses; excavate in wetlands or on or after October 1, 2001, conduct the following activities in a wetland: 1. New activities to cause draining that significantly alters or degrades existing wetland acreage or functions; 2. Filling or dumping; 3. Permanent flooding or impounding; or 4. New activities that cause significant alteration or degradation of existing wetland acreage or functions.

- d) There was no flagging or inadequate flagging of non-impacted surface waters within 50 feet of permitted activities at impact area “D,” at the end of the stormwater channel between impact areas “A” and “S.” and below impact area “O.”

VWP Permit 06-2855 Part I.C.25, states, “[a]ll *non-impacted* wetlands, streams, and designated upland buffers that are within the project or right-of-way limits, and that are within fifty feet of any project activities, shall be clearly flagged or demarcated for the life of the construction activity within that area. All non-impacted open water areas within the project or right-of-way limits, and that are within fifty feet of any project activities, shall be clearly flagged or demarcated, as practicable, for the life of

the construction activity within that area. The permittee shall notify all contractors and subcontractors that *no activities are to occur in these marked areas.*

- e) The construction monitoring report due by April 10, 2013, was not received.

VWP Permit 06-2855 Part I.H.10, states, “[c]onstruction Monitoring Reports shall be submitted to DEQ quarterly. The reports shall be submitted by the 10th calendar day of the month after the quarter in which monitoring takes place.”

4. On June 12, 2013, DEQ issued NOV No. 13-06-PRO-701 to Watermark for the violations described in paragraph C(3) above.
5. On July 8, 2013, DEQ staff met with representatives of Watermark to discuss the violations.
6. On, July 25, 2013, DEQ staff confirmed the construction monitoring report had been submitted on March 19, 2013, and received by the USACE on March 22, 2013.
7. On November 8, 2013, DEQ staff conducted file review and a site visit at the Property and confirmed that Watermark was now in compliance with the Permit.
8. Based on the results of the site inspections, review of the Permit file, and the July 8, 2013, meeting, the Board concludes that Watermark has violated the Permit conditions listed above, Va. Code § 62.1-44.15:20(A), 9 VAC 25-210-50(A) and 9 VAC 25-210-180 F(8) as described above.
