

Hazardous Waste 2013 Biennial Reporting

The 2013 Biennial Report for all Large Quantity Generators and TSD Facilities is due to the Virginia Department of Environmental Quality (VADEQ) by March 1, 2014. This report is for hazardous waste generated and managed in calendar year 2013.

DEQ encourages facilities to file their report online using Easitrak at:

http://www.arminc.net/ARM_Home/default.asp

If completing and submitting your report online using Easitrak, please submit a signed copy of the Easitrak “electronic filing certification document” that is provided when you click the “Submit to State” button as well as a signed paper copy of the completed RCRA Subtitle C Site Identification Form (EPA Form 8700-13A/B, Revised 2/2013.) to the VADEQ to the address below.

However, if a facility wishes to submit a hard copy of their report, form and instruction book is available at USEPA web site: <http://www.epa.gov/epawaste/inforesources/data/biennialreport/index.htm>

Completed Easitrak certification including 8700-13 (signed) or hard copy of HW biennial report can be sent by regular mail to:

Attn: Sanjay V. Thirunagari
Land Division
Virginia Department of Environmental Quality
P.O. Box 1105
Richmond, VA 23218

Or by FedEx to:

Attn: Sanjay V. Thirunagari
Land Division
Virginia Department of Environmental Quality
629 East Main Street
Richmond, VA 23219

For more information, please contact Maria Livaniou at (804) 698-4208 or maria.livaniou@deq.virginia.gov.

Information on Changes to the 2013 Hazardous Waste Report Instructions and Forms

Consolidated Management Method Codes

Some management method codes have been consolidated in order to ease reporting. For example, previous codes H071 (chemical reduction), H073 (cyanide destruction), H075 (chemical oxidation), H076 (wet air oxidation) and H077 (other chemical precipitation) have all been consolidated under the new management method code H070 (chemical treatment). The management method codes for this 2013 reporting year have been mapped to the management method codes used for previous years in order to assist filers with the transition.

Revised Waste Minimization Codes

The waste minimization codes have been revised in order to assist filers with reporting their waste minimization activities. The new waste minimization codes identify when waste minimization activities occurred (whether initiated prior to the reporting year or during the reporting year) and also provide examples of types of waste minimization activities.

Revised Language For Some Source Code Descriptions

Editorial changes were made to the description of some source codes in order to improve clarity for filers. For example, G25 was changed from “hazardous waste management” to “treatment, disposal, or recycling of hazardous waste” in order to better communicate the meaning of this code.

Revised North American Industry Classification System (NAICS) Codes

In completing the 2013 Hazardous Waste Report, sites should use the new 2012 NAICS codes established by the U.S. Census Bureau. Significant changes were made to the NAICS codes in 2012. All sites should confirm their NAICS codes in the new 2012 NAICS code table, which can be found at <http://www.census.gov/eos/www/naics>.
