### VIII. DISCUSSION POTENTIAL REGULATORY JURISDICTION

As a separate attachment, provide complete and detailed information in response to the following eligibility questions. It is permissible to reference specific sections of existing site reports however, it is requested that that information be summarized. It is important that essential information, such as type, amounts of materials, and the date of release/disposal be discussed. The outline below is provided to ascertain appropriate information as defined in 9 VAC 20-160-30 so that DEQ can expeditiously provide a VRP Eligibility Determination. For sites with multiple addresses, please include this information for each address.

Nature of Release	Describe the environmental condition of the site proposed for participation in the VRP. The description must include at a minimum all information of which the applicant is aware concerning the nature and extent of any known contamination at the site and/or immediately contiguous to the site from any identified recognized environmental condition. The description must include pertinent information such as type of material released/disposed, cause of release, dates of release(s), location of release(s). extent of offsite impacts.
CERCLA Investigation	Describe any investigations that have been conducted relative to the property under the auspices of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), also referred to as Superfund.
CERCLA / NPL Listing	Has the site or any portion of the property ever been listed or proposed for listing on the National Priorities List (NPL) established under CERCLA? If so, please describe.
Petroleum or oil releases	Is the release(s) involved currently being regulated or has been regulated under Article 9 (Va. Code §§ 62.1 -44.34.8 <i>et seq.</i> ) or Article 11 (Va.Code §§ 62.1-44.34:14 <i>et seq.</i> ) of the Virginia State Water Control Law? If so, please describe. For releases involving petroleum compounds, it is advisable to inquire with the appropriate regional office about the potential applicability of these articles. Please include any Pollution Complaint numbers (PC#) issued to the site.
RCRA	Discuss if the site at which the release occurred is subject to the Virginia Hazardous Waste Management Regulations (9 VAC 20-60-10 <i>et seq.</i> ). Provide all EPA ID numbers associated with the site. Indicate if the site is or was a hazardous waste (HW) generator. Indicate if HW was treated, stored or disposed of at the site.
Present or Past Permits	Please identify any permits issued by the DEQ or USEPA (air, water, waste) pertaining to the site. Please understand the EPA ID Numbers for hazardous waste generators are not permits and should be identified in the discussion of RCRA jurisdiction.
Enforcement Action	Discuss if remediation of the subject release is currently subject to an enforcement action pursuant to city, county, state, or federal environmental laws. Enforcement actions are generally interpreted as orders or civil lawsuits issued by governmental entities to conduct regulated activities at a property or facility. They include environmental orders or agreements (e.g., Consent Order / Agreement, Interim Agreement, Letter Agreement, etc.) with a city, county, state, or federal agency.
Open Dump/unpermitted facility	Please indicate is solid waste, construction debris, demolition debris, industrial waste, ash or any other waste has been disposed or otherwise managed on the site. Discuss if the site been determined, prior to application submittal, to be an open Dump/unpermitted facility under 9VAC20-81-45, and such conditions still exist.
Waste Generator	Discuss if there are any past or current activities conducted at the property that require classification as an EPA or Virginia Hazardous Waste Generator. If a facility or operation on the property was or is classified as a hazardous waste generator, specify the applicable identification number where indicated.
Immediate Risk	Please respond by indicating, to the best of your knowledge, if contamination at the property poses an immediate risk of harm to human health and the environment.
Impact to Drinking Water	Indicate if contamination at the property has the potential to impact, or has already impacted, public or private drinking water wells or surface water supplies, such as supply intakes or streams or lakes.
