Solid Waste Managed in Virginia During Calendar Year 2012

EXECUTIVE SUMMARY

Section 10.1-1413.1 of the Code of Virginia requires the Department of Environmental Quality (DEQ) to prepare a report by June 30 of each year describing the amount of solid waste disposed of in the Commonwealth during the preceding calendar year. Facilities that have solid waste management permits are required to provide DEQ with information to prepare this report. As of April 29, 2013, 206 permitted facilities provided information on their activities for calendar year 2012 for this report.

Based on the facilities' reports, a total of 20,255,675.15 tons of solid waste was received at Virginia's permitted solid waste management facilities during calendar year 2012. Of this total, 14,877,701.90 tons originated in the Commonwealth and 5,377,973.25 tons originated from other jurisdictions.

Municipal solid waste (MSW) constituted 11,929,167.91 tons of the total amount of solid waste received during calendar year 2012. Of the total MSW received, 8,268,439.89 tons originated in the Commonwealth and 3,660,728.02 tons originated from other jurisdictions.

Five jurisdictions accounted for 97.68% of all waste received from out-of-state sources: Maryland (40.81%); New York (26.72%); Washington, D.C. (20.10%); New Jersey (6.42%); and North Carolina (3.62%).

During calendar year 2012, the total solid waste, MSW and construction/demolition/debris (CDD) waste received from out-of-state decreased by 3.42%, 4.63% and 8.83% respectively, compared to 2011 amounts. For waste originating in Virginia during the same period, the total solid waste and MSW waste received decreased by 1.85% and 3.94% respectively and CDD increased by 8.94% compared to 2011 amounts.

Of the solid waste managed in Virginia during the year, 73.98% or 12,463,562.41 tons were landfilled on-site, 12.80% or 2,156,516.22 tons were incinerated on-site, and the rest was managed by other means (see Table 3). Of all solid waste received at Virginia facilities during the year, 58.89% was MSW, 19.84% was CDD waste, and the remainder was other types of waste.

Permitted solid waste management facilities reported that 8.51% of the waste they managed was diverted from disposal by recycling or mulching; 0.99% of the total waste managed was composted. Most recycling occurs at facilities other than permitted waste management facilities. Local governments provide more complete information on the recycling of waste generated in Virginia. For more detailed information about recycling rates in Virginia see the Calendar Year 2011 Virginia Annual Recycling Rate Report at <http://www.deq.virginia.gov/Programs/LandProtectionRevitalization/RecyclingandLitterPreventionPrograms.aspx>
A report on the statewide recycling rate for calendar year 2012 will be issued later this year.

Permitted facilities were required to report on their available capacity and the expected life of the facilities based on current disposal rates. This information shows that at current rates, the remaining available landfill capacity is as follows: MSW – 21.7 years; CDD – 29.5 years; and non-captive industrial – 4.6 years. These projections do not account for population increases, changes in waste generation, or the closing of older MSW disposal units pursuant to statute.

At the option of the facility owner, Virginia Code § 10.1-1413.1 provides that the data collected may include an accounting of the facility's economic benefits to the locality where the facility is located. Ten facilities provided such information for calendar year 2012.

Solid Waste Managed in Virginia During Calendar Year 2012

I. Introduction

This report has been prepared in accordance with Virginia Code § 10.1-1413.1, which requires DEQ to prepare a report by June 30 of each year describing the amount of solid waste disposed of in the Commonwealth during the preceding calendar year. All permitted facilities (except for captive waste management facilities) that treat, store or dispose of solid waste are required to provide DEQ with information in their possession as is reasonably necessary for DEQ to prepare this report. The requirements for reporting are set forth in the Virginia Administrative Code, 9VAC20-81-80.

II. Reporting Procedures

For each category of solid waste, permitted solid waste facilities in Virginia were asked to report the amount of waste that they received, the method by which the waste was managed, the jurisdiction where the waste originated, if known, and the facility's remaining capacity. A copy of the reporting table, DEQ Form 50-25, for furnishing information to DEQ is provided as Attachment 1. DEQ Form 50-25 was revised on November 26, 2012 to include a column for reporting mined materials and regroup the waste management columns.¹

The facilities identified amounts of solid waste by each of the following categories:

- municipal solid waste
- construction/demolition/debris
- industrial waste
- regulated medical waste
- vegetative and yard waste
- incineration ash
- sludge other than land applied in accordance with Virginia Code 62.1-44.19:3
- tires
- white goods (e.g., refrigerators, washing machines)
- friable asbestos
- petroleum-contaminated soil
- other waste

The facilities also reported on each of the following methods of waste management:

- recycled on-site
- composted on-site
- landfilled on-site

¹ Landfill mining is the excavation of previously landfilled materials.
Solid Waste Managed in Virginia – 2012

- incinerated on-site
- sent off-site to be recycled
- sent off-site to be treated, stored or disposed
- stored on-site at the beginning of the reporting period
- stored on-site at the end of the reporting period
- mulched
- other

Facilities submit this data on-line or by paper copy to the appropriate DEQ Regional Office. Facilities may log on line at the Virginia Solid Waste Information and Assessment (SWIA) webpage to submit data at

<http://www.deq.state.va.us/Programs/LandProtectionRevitalization/SolidHazardousWasteRegulatoryPrograms/SolidWaste/SolidWasteInformationandAssessmentProgram.aspx>.

For the facilities that provided information, 11.17% (23 facilities) submitted paper copies and 88.83% (183 facilities) submitted the information on-line.

This report does not include the waste management activities from captive waste management facilities because they are statutorily exempt from the reporting requirements. A captive facility is one that is located on property owned or controlled by the generator of the waste. Most captive waste management facilities in Virginia are industrial landfills or regulated medical waste facilities. As a result, the reported amounts of industrial waste, regulated medical waste and sludge represent only the portion that is managed in off-site facilities. In addition, this report does not reflect tires managed under the Waste Tire Trust Fund at facilities that do not require a permit.

Permitted solid waste management facilities reported that 8.51% of the waste they managed was diverted from disposal by recycling or mulching; 0.99% (166,723.32 tons) of the total waste managed was composted. Most recycling occurs at facilities other than permitted waste management facilities. Local governments provide more complete information on the recycling of waste generated in Virginia. For more detailed information about recycling rates in Virginia see the Calendar Year 2011 Virginia Annual Recycling Rate Report at:

<http://www.deq.virginia.gov/Programs/LandProtectionRevitalization/RecyclingandLitterPreventionPrograms.aspx>

A report on the statewide recycling rate for 2012 will be issued later this year.

III. Receipt of Assessment Reports

By regulation, facilities must submit their reportable data by March 31 each year. Facilities are required to submit a separate reporting table for each jurisdiction from which they received waste during the prior year. Information from reporting tables received on or before April 29, 2013, has been included in this report. For 2012, 206 permitted facilities reported their activities. Last year, 208 facilities reported their activities for 2011. For a list of the facilities reporting this year, see Attachment 2. These facilities submitted 349 separate reporting tables, representing waste received from 27 states and jurisdictions (including Virginia and Washington, D.C.).

IV. Discussion of Reported Waste Management Activities

Table 1 summarizes the quantities of waste that facilities received and managed during 2012 by waste type and waste management method. As shown in the table, 20,255,675.15 tons of solid waste was received at Virginia's permitted solid waste management facilities during 2012. Municipal solid waste constituted 11,929,167.91 tons of the total amount of solid waste received.²

The column of Table 1 entitled "Landfilled On-Site" indicates the quantity of solid waste disposed of at permitted solid waste landfills in the Commonwealth during calendar year 2012. The amount of solid waste landfilled during the year was 12,463,562.41 tons. This is a decrease of 3.21% from the 12,877,404.99 tons landfilled in 2011. The other columns of Table 1 indicate the quantity of waste managed by other methods.

Table 2 shows the quantities of solid wastes imported from outside Virginia. Five jurisdictions accounted for 97.68% of all waste received from out-of-state sources: Maryland (40.81%); New York (26.72%); Washington, D.C. (20.10%); New Jersey (6.42%); and North Carolina (3.62%).

Table 3 shows the percentage of each method of solid waste management used. Based on the management methods included in Table 3, the majority of solid waste managed in the Commonwealth during the year was landfilled on-site (73.98%) or incinerated (12.80%). Lesser amounts were reported as managed by recycling on-site and off-site (6.68%), mulched (1.83%), composted on-site (0.99%), stored on-site at the end of the year (1.26%), or other methods (2.47%). Mined materials (72,108.55 tons), waste stored at the facilities at the beginning of the year (198,760.76 tons), and waste that was sent off-site for treatment, storage, or disposal (4,254,138.87 tons) are not included in Table 3 or in the basis for calculating percentages for Figure 1. Waste stored on-site at the beginning of the year is similar to waste received and is not considered a management method. Waste that was simply sent off-site to another permitted Virginia facility for treatment, storage or disposal would also be included in the receiving facility's reporting tables.

Table 4 shows the composition of the solid waste stream. Of all the solid waste received at Virginia facilities in 2012, 58.89% was MSW and 19.84% was CDD waste.

Table 5 shows the total quantity of waste received from the top five individual out-of-state jurisdictions.

Figure 1 compares the amount of waste received at facilities from out-of-state jurisdictions to the amount received from Virginia during 2012. Of the total amount of solid waste received (20,255,675.15 tons), approximately 14,877,701.90 tons originated in the Commonwealth, and 5,377,973.25 tons originated from other jurisdictions. Thus, of all the

² When referring to information from Table 1, "waste received" refers to information from the first column, and "waste managed" refers to information from the remaining columns on Form DEQ 50-25 except "mined materials" or as noted. The amount of waste "received" for each type of waste may not match the sum of the reported amounts identified for each method of waste management. This reflects information as submitted by facilities in the reporting tables. In particular, incinerators may properly include the ash that they generate as waste that is "sent off site," and not include it as waste that is "received" at that facility.

waste received at Virginia facilities in 2012, 26.55% originated from other jurisdictions. Of the total MSW received (11,929,167.91 tons), approximately 8,268,439.89 tons originated in the Commonwealth, and 3,660,728.02 tons originated from other jurisdictions. Of the total CDD received (4,019,220.56 tons), approximately 3,351,167.66 tons originated in the Commonwealth, and about 668,052.90 tons originated from other jurisdictions.

Figure 2 shows a comparison of total solid waste received from 2006 through 2012 from Virginia and out-of-state sources. Figure 3 shows the same comparison for MSW. The total amount of solid waste received at facilities during 2012 decreased by 2.27% (471,063.74 tons) below 2011 amounts. For out-of-state sources during 2012, the total waste decreased 3.42% (190,386.41 tons), MSW decreased by 4.63% (177,654.70 tons), and CDD decreased by 8.83% (64,735.22 tons) from 2011. For Virginia sources during the same period, the total waste decreased 1.85% (280,677.33 tons), MSW decreased by 3.94% (339,487.44 tons), and CDD increased by 8.94% (274,999.96 tons). This report does not reflect the amount of solid waste exported from Virginia to other states. DEQ regulates only the treatment, storage, and disposal of solid waste within the Commonwealth. Virginia facilities and waste generators are not required to submit information on the amount of solid waste exported to other states.

V. Capacity Information

Permitted facilities that treat, store, or dispose of solid waste are required to report the available capacity, expected life and current disposal rates. This information is summarized in Attachment 3.³

MSW landfills reported a total available capacity of 219,134,023.05 tons and a current disposal rate of 10,078,353.10 tons per year. Thus, at the current disposal rate, there would be approximately 21.7 years of available MSW landfill capacity in the Commonwealth. This calculation does not account for population changes, changes in waste generation, or the future closings of older MSW disposal units under Virginia Code § 10.1-1413.2. Nor does it include facilities that have not been built and are not accepting waste for which permits may have been issued. Last year, it was reported that there were approximately 20.6 years of remaining MSW disposal capacity.

CDD landfills reported a total available capacity of 52,246,183.80 tons and a current disposal rate of 1,769,300.60 tons per year. At the current disposal rate, there would be approximately 29.5 years of available CDD landfill capacity in the Commonwealth. Last year, it was reported that there were approximately 16.7 years of remaining CDD disposal capacity.

Non-captive industrial landfills reported a total available capacity of 1,601,089.18 tons and a current disposal rate of 348,031.97 tons per year. At the current disposal rate, there

³ Facilities report available capacity in cubic yards. The available capacity is estimated using the following conversion factors: 1,000 lbs. of MSW = 1 cu. yd.; 1,200 lbs. of CDD waste = 1 cu. yd.; and 1,000 lbs. of industrial waste = 1 cu. yd. The available capacity for individual facilities may vary, depending on factors such as a facility's compaction rate and use of daily cover materials. The last column in Attachment 3 sets forth the reported remaining life as estimated by individual facilities.

would be approximately 4.6 years of remaining capacity. Last year, it was reported that there were approximately 5.5 years remaining capacity for non-captive industrial facilities.

VI. Reports of Economic Benefits

At the option of the facility owner, Virginia Code § 10.1-1413.1 provides that the data collected may include an accounting of the facility's economic benefits to the locality where the facility is located. This may include the value of disposal and recycling facilities provided to the locality at no cost or reduced cost, direct employment associated with the facility, and other economic benefits resulting from the facility during the preceding calendar year. Ten facilities provided such information for 2012. See Attachment 4 for details.

Table 1 – Solid Waste Managed in Virginia – 2012 (in Tons)

Waste Type	Total Waste Received ⁴	Mined Materials	Onsite Management of Waste						Sent Offsite to be:		Stored Onsite	
			Landfilled	Recycled ⁵	Composted	Incinerated	Mulched	Other ⁶	Recycled	Treated, Stored, Disposed	Beginning of Year	End of Year
Municipal Solid Waste	11,929,167.91	21,723.75	7,215,012.44	605.00	1,827.32	2,148,587.27	100.00	1,133.95	86,933.27	2,491,097.01	7,981.70	13,569.00

Regulated Medical Waste	6,849.03	0.00	0.00	0.00	0.00	0.00	0.00	4,836.01	0.00	2,013.02	0.00	0.00
Vegetative/Yard Waste	467,446.51	0.00	19,608.25	1,530.48	120,967.81	0.00	261,470.15	17,987.04	32,735.09	11,558.84	103,488.62	105,077.47
Incineration Ash	764,665.85	0.00	600,750.13	3,976.50	0.00	0.00	0.00	156,521.28	31,080.42	539,196.81	0.00	0.00
Sludge	530,948.50	0.00	441,663.55	14,351.19	26,079.22	0.00	0.00	42,058.85	4,312.00	2,483.69	0.00	0.00
Tires	93,421.50	0.00	4,186.27	17,216.04	0.00	0.00	0.00	21,977.15	41,537.24	5,536.90	4,126.03	7,093.93
White Goods	18,123.29	0.00	0.00	1,035.00	0.00	0.00	0.00	0.00	16,922.00	160.00	162.11	155.41
Friable Asbestos	19,872.67	0.00	19,848.27	0.00	0.00	0.00	0.00	0.00	0.00	26.04	5.08	3.44
Petroleum Contaminated Soil	335,835.72	0.00	266,870.32	6,879.53	0.00	0.00	28,137.00	9,122.42	29,033.00	154.98	10,777.03	6,415.50
Other Waste	866,683.97	0.00	77,186.67	49,926.30	2,562.98	10.52	2,035.58	96,464.19	212,386.58	442,571.59	27,568.40	19,816.32
Total	20,255,675.15	72,108.55	12,463,562.41	467,775.64	166,723.32	2,156,516.22	308,355.48	415,373.58	657,369.27	4,254,138.87	198,760.76	211,642.41

⁴ The amount of “Total Waste Received” and “Stored On-Site at the Beginning of the Year” may not precisely match the sum of the reported amounts for the remaining columns (i.e., each method of managing the waste). This difference reflects information submitted in the reporting tables. In particular, incineration ash generated by an energy recovery facility or incinerator may be listed as “sent off site to be treated, stored, or disposed” even though it was not “received” as ash at that facility. The total waste managed may be greater than the waste received due to ash generated at a facility. VW/YW may be composted to produce a product that is not managed as waste.

⁵ The majority of recycling takes place at facilities that do not require a permit from the Department and were not required to submit data for this report. Therefore, the amounts shown in this column represent a substantial underestimate of the true recycling rate in the Commonwealth. A report on the statewide recycling rate for calendar year 2012 will be issued later this year. See the Calendar Year 2011 Virginia Annual Recycling Rate Report at <http://www.deq.virginia.gov/Programs/LandProtectionRevitalization/RecyclingandLitterPreventionPrograms.aspx>.

⁶ “Other” methods of management may include steam sterilization of medical waste, approved use of shredded tires at permitted facilities, and thermal treatment of petroleum contaminated soil, among others.

Table 3 – Methods of Solid Waste Management – 2012 (in Tons)

Methods of Solid Waste Management		
	Amount Managed (in Tons)	Percentage
Landfilled On-Site	12,463,562.41	73.98%
Incinerated On-Site	2,156,516.22	12.80%
Sent Off-Site to be Recycled	657,369.27	3.90%
Recycled On-Site	467,775.64	2.78%
Other	415,373.58	2.47%
Mulched	308,355.48	1.83%
Stored On-Site End of Year	211,642.41	1.26%
Composted On-Site	166,723.32	0.99%
Waste Management Total	16,847,318.33	

Note: The basis for determining these percentages is the sum for all methods of waste management (recycled, composted, landfilled, etc.) in Table 1, with the exception of: (1) waste stored on-site at the beginning of the year (which is similar to waste received) and (2) waste that was sent off-site for treatment, storage or disposal (i.e., waste that was simply transferred to another facility for ultimate management). Accounting for those two exceptions, the basis for these percentages is 16,847,318.33 tons. Facilities that mine landfill materials report how much material was mined and how it was managed. Most recycling occurs at facilities other than permitted waste management facilities.

See the Calendar Year 2011 Virginia Annual Recycling Rate Report at

<http://www.deq.virginia.gov/Programs/LandProtectionRevitalization/RecyclingandLitterPreventionPrograms.aspx>. A report on the statewide recycling rate for calendar year 2012 will be issued later this year.

Table 4 – Composition of the Solid Waste Stream – 2012 (in Tons)

Composition of the Solid Waste Stream		
	Amount (in Tons)	Percentage
Municipal Solid Waste	11,929,167.91	58.89%
Construction/Demolition/Debris	4,019,220.56	19.84%
Industrial Waste	1,203,439.64	5.94%
Other Waste	866,683.97	4.28%
Incineration Ash	764,665.85	3.78%
Sludge	530,948.50	2.62%
Vegetative/Yard Waste	467,446.51	2.31%
Petroleum Contaminated Soil	335,835.72	1.66%
Tires	93,421.50	0.46%
Friable Asbestos	19,872.67	0.10%
White Goods	18,123.29	0.09%
Regulated Medical Waste	6,849.03	0.03%
Total	20,255,675.15	

Table 5 –Waste Received from Out-of-State Jurisdictions – 2012 (in Tons)

Top 5 States		
State	Tons	Percentage
Maryland	2,194,632.82	40.81%
New York	1,437,091.21	26.72%
District of Columbia	1,081,122.70	20.10%
New Jersey	345,354.85	6.42%
North Carolina	194,861.21	3.62%
Total	5,253,062.79	97.68%

Note: See Table 2 for more details.

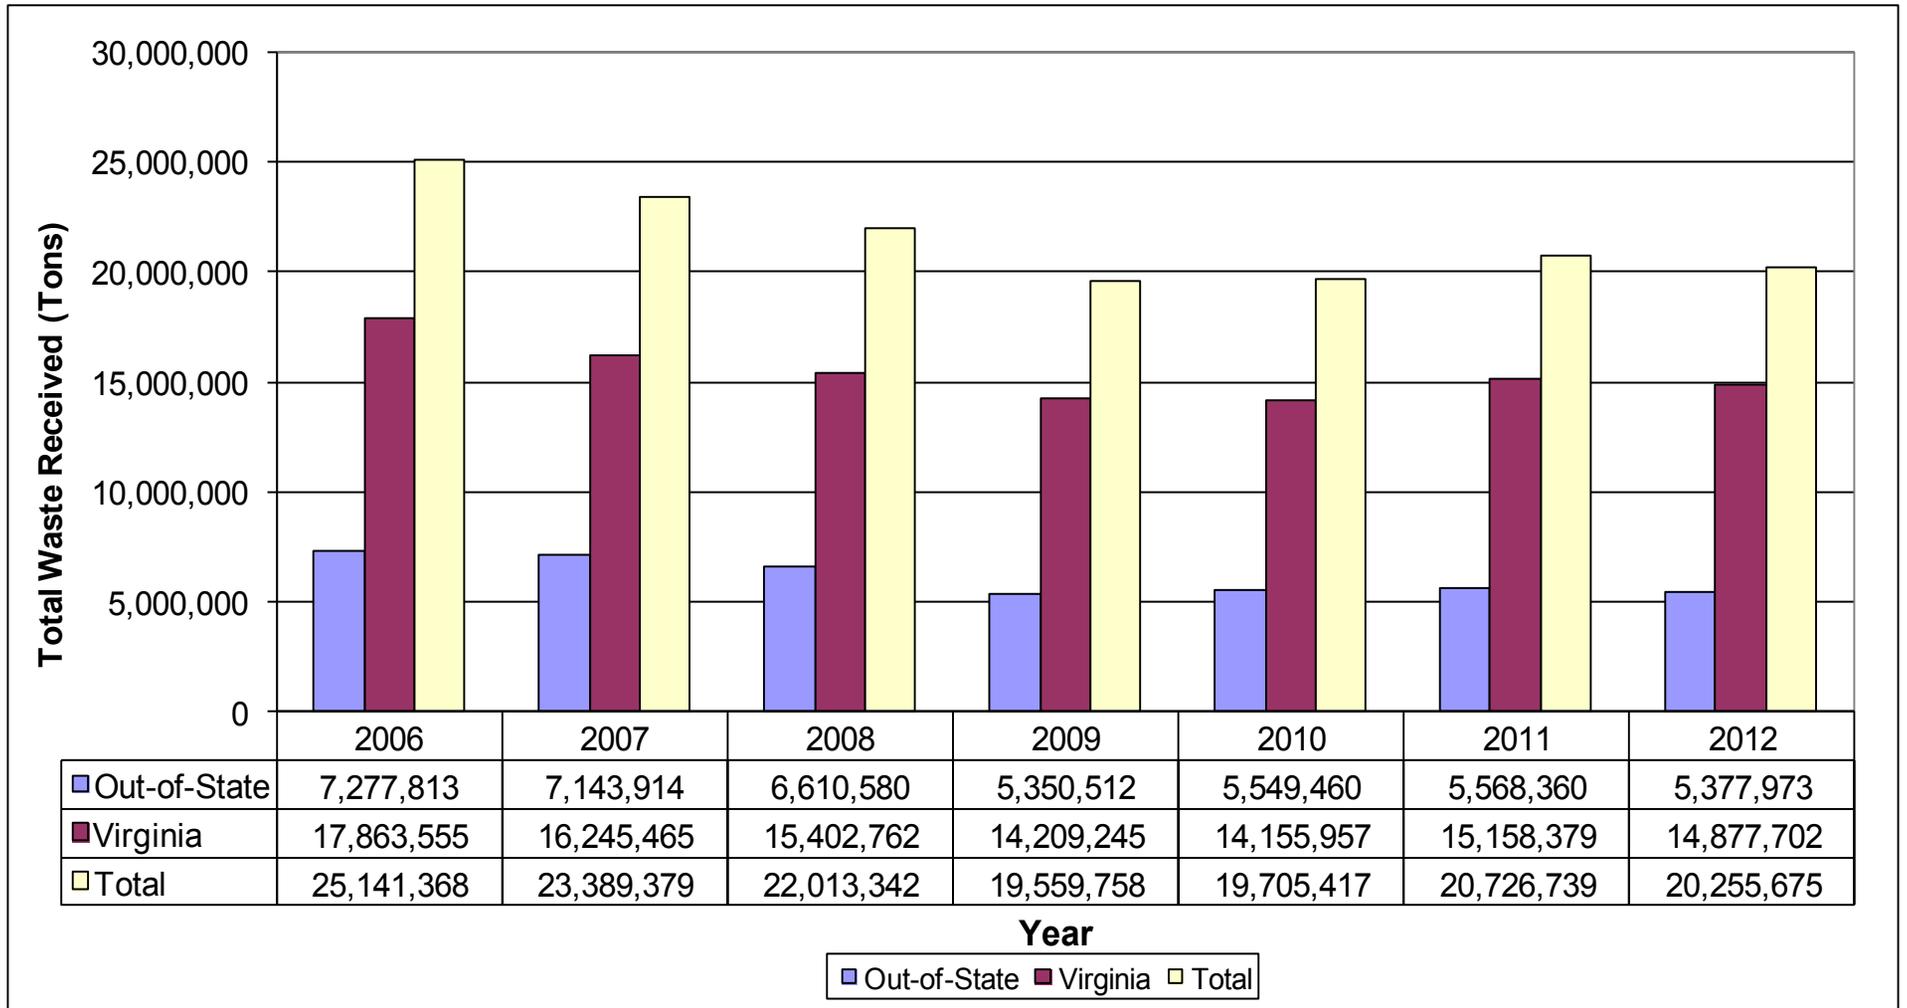

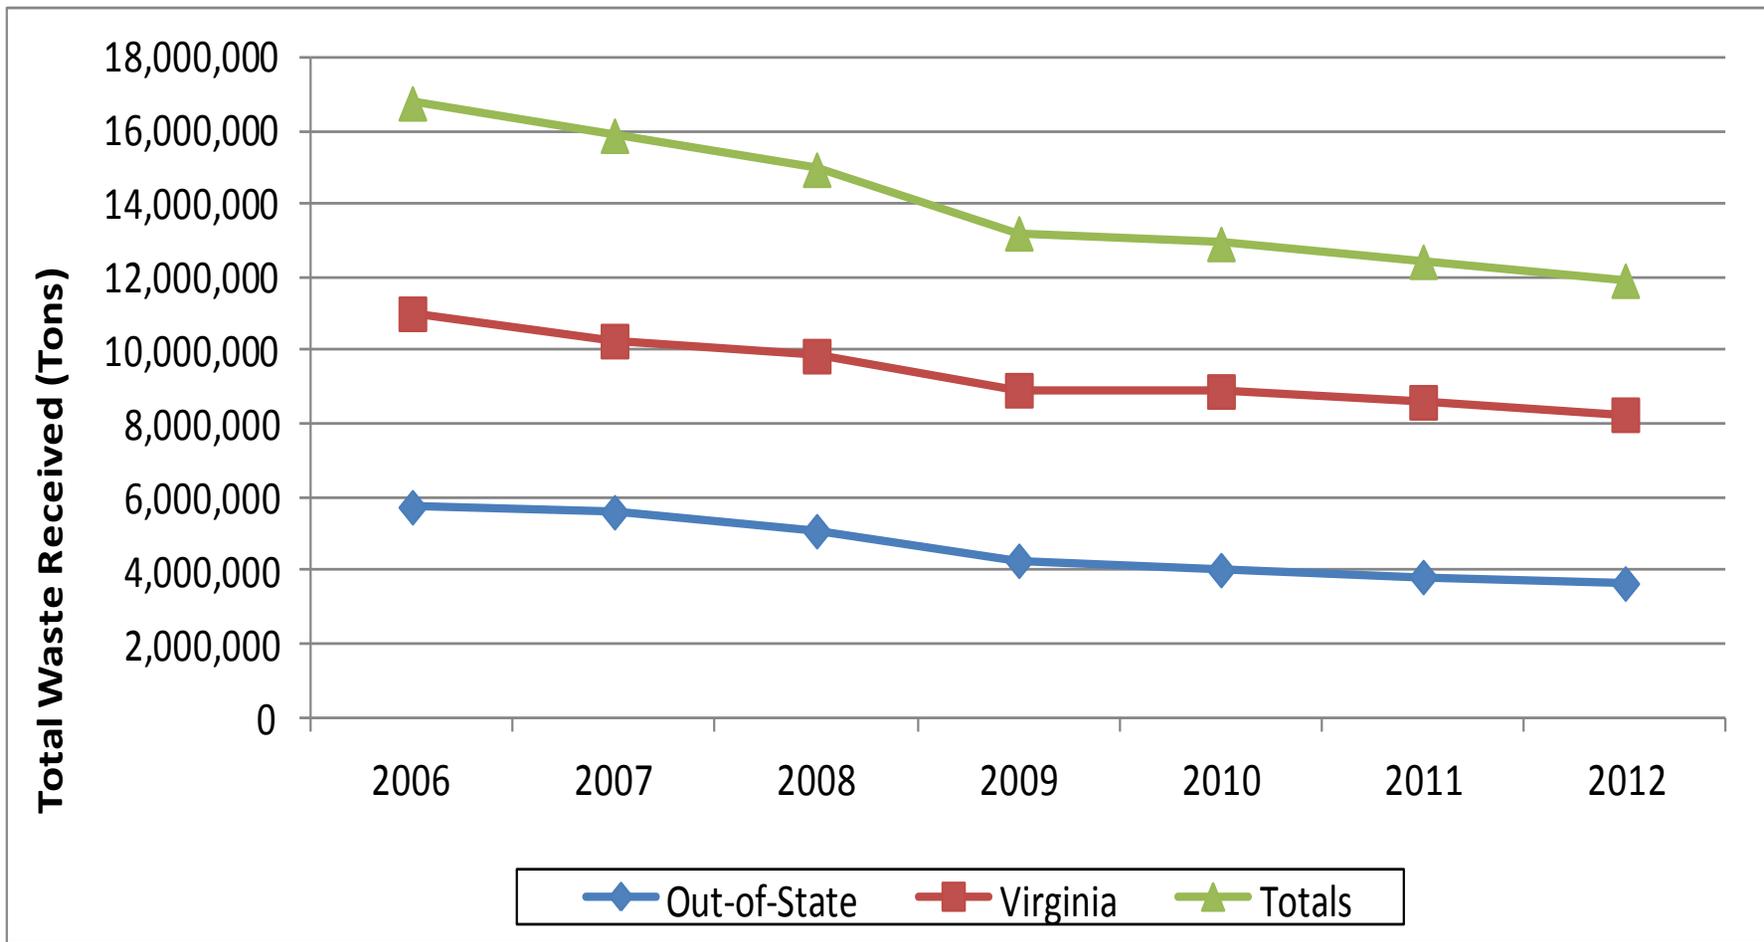

Figure 3 – Municipal Solid Waste Received from 2006 through 2012

Attachment 1 – Reporting Table

SOLID WASTE INFORMATION AND ASSESSMENT PROGRAM REPORTING TABLE - FORM DEQ 50-25

1	Facility Name		
2	Permit Number	3 Date Submitted to DEQ	4 Annual Reporting Period
5	Preparer's First Name	Middle Initial	Last Name
6	Telephone		
7	Preparer's E-mail Address		
8	Has there been a change to the Annual Fee Billing Contact, Address or Telephone Number? <input type="checkbox"/> Yes <input type="checkbox"/> No		
	Contact First Name	Last Name	Contact Phone
	Address		E-Mail
	City	State	Zip Code
9A	Remaining Permitted Capacity	Cubic Yards	If a facility's permitted capacity is reported in tons, please note this below in Facility Comments. DEQ will apply conversion factors based on the type of waste in order to calculate the volume and the number of years of permitted capacity available in the state.
9B	Expected Remaining Permitted Life	Years	
10	Does facility have active scales? <input type="checkbox"/> Yes or <input type="checkbox"/> No Note: facilities with no active scales must enter the total amount landfilled in cubic yards.		Total amount landfilled in cubic yards for all jurisdictions
11	Originating Jurisdiction		11A Statement of Economic Benefits submitted? <input type="checkbox"/> Yes or <input type="checkbox"/> No
12	Facilities landfilling VA incineration ash Use the supplemental form to provide the facility from which ash was received and the amount.		

Waste amounts measured in : Tons or Cubic Yards

Waste Type	Total Amount of Waste Received (a)	Mined Materials (b)	On-site Management of Waste						Sent Off-site to be: (i)		Stored On-site (j)	
			Landfilled (c)	Recycled (d)	Composted (e)	Incinerated (f)	Mulched (g)	Other (h)	Recycled	Treated, Stored, Disposed	Beginning of Reporting Period	End of Reporting Period
13	Municipal Solid Waste											
14	Construction/ Demolition/Debris											
15	Industrial Waste											
16	Regulated Medical Waste											
17	Vegetative/Yard Waste											
18	Incineration Ash											
19	Sludge											
20	Tires											
21	White Goods											
22	Friable Asbestos											
23	Petroleum Contaminated Soil											
24	Other Wastes (specify)											
25	Total											

Facility Comments

--

Complete a separate form for each jurisdiction.

See the instructions for completing Form DEQ 50-25. A separate form is provided for the optional Statement of Economic Benefits.

Revised 11/26/2012

SUPPLEMENTAL SOLID WASTE INFORMATION AND ASSESSMENT PROGRAM REPORTING TABLE - FORM DEQ 50-25

Only those facilities that landfill Virginia incineration ash provide this information.

Permit Number	Annual Reporting Period
Facilities landfilling VA incineration ash: Received from Permit No., Facility Name	VA ash amount measured in
	<input type="checkbox"/> Tons <input type="checkbox"/> Cubic Yards

Facility Comments

<p>Facilities should use the same units of measure (Cubic Yards or Tons) for Rows 12 - 24. Facilities that do not landfill VA incineration ash do not complete this supplemental form. See the instructions for completing Form DEQ 50-25.</p>	<p>Revised 11/26/2012</p>
--	---------------------------

Note: Facilities submit data on-line or send a paper copy to the appropriate DEQ Regional Office. Facilities may log on-line at the Virginia Solid Waste Information and Assessment (SWIA) page to review instructions and submit data at <http://www.deq.state.va.us/Programs/LandProtectionRevitalization/SolidHazardousWasteRegulatoryPrograms/SolidWaste/SolidWasteInformationandAssessmentProgram.aspx>.

Summary of Remaining Capacity and Remaining Life

Facility Type	Number of Facility Type	Reported Available Capacity on 12/31/2012	Reported Annual Disposal Rate 2012	Remaining Capacity (Years)
MSW (Sanitary) Landfills	55	219,134,023.05	10,078,353.10	21.7
CDD Landfills	14	52,246,183.80	1,769,300.60	29.5
Non-Captive Industrial Landfills	2	1,601,089.18	348,031.97	4.6

Attachment 4 – Data Provided by Facilities Regarding Economic Benefits

Virginia Code § 10.1-1413.1.B provides that facility owners may provide “an accounting of the facility’s economic benefits to the locality where the facility is located, including the value of disposal and recycling facilities provided to the locality at no cost or reduced cost, direct employment associated with the facility, and other economic benefits resulting from the facility during the preceding calendar year.” The information presented below is for the 2012 calendar year.

Waste Management of Virginia reported economic benefit information for the following six solid waste management facilities: Amelia (Amelia Landfill), Charles City (Charles City Landfill), King George (King George Landfill), Sussex (Atlantic Waste Disposal Landfill), Hampton (Bethel Landfill) and Gloucester (Middle Peninsula Landfill).

Amelia (Amelia Landfill):

- Host fees of \$1,351,639
- Free disposal and recycling costs to localities of \$286,199
- Local/State taxes of \$171,075

Charles City (Charles City Landfill):

- Host fees of \$2,464,092
- Free disposal and recycling costs to localities of \$138,663
- Local/State taxes of \$118,708

King George (King George Landfill):

- Host fees of \$7,268,483
- Free disposal and recycling costs to localities of \$392,220
- Local/State taxes of \$181,151

Sussex (Atlantic Waste Disposal Landfill):

- Host fees of \$5,547,436
- Free disposal and recycling costs to localities of \$236,116
- Local/State taxes of \$236,116

Hampton (Bethel Landfill):

- Host fees of \$1,234,357
- Local/State taxes of \$184,452

Gloucester (Middle Peninsula Landfill):

- Host fees of \$523,776
- Free disposal and recycling costs to localities of \$521,706
- Local/State taxes of \$108,635

Four other solid waste management facilities reported economic benefit information.

Loudoun County (Loudoun County Sanitary Landfill) reported the following benefits to Loudoun County:

- Free or reduced cost disposal and recycling totaling \$1,049,240; fees waived for VDOT, public schools, local governments and non-profit organizations
- Direct employment associated with the facility of \$1,106,612

Carroll-Grayson-Galax Sanitary Landfill, SWP508, reported the following benefits to the counties of Carroll and Grayson and the city of Galax:

- Free or reduced cost disposal and recycling totaling \$5,060
- Direct employment associated with the facility of \$1,655
- The Wired Road - 127,500
- Small Business Development - \$17,719

Carroll-Grayson-Galax Sanitary Landfill, SWP605, reported the following benefits to the counties of Carroll and Grayson and the city of Galax:

- Direct employment associated with the facility of \$7,480
- The Wired Road - \$42,500
- Blue Ridge Cross Roads - \$70,000

Washington County, PBR003, reported the following benefits to the county of Washington:

- Reduce waste stream and disposal to landfill - \$60,000 per year
- Value of disposal and recycling at no cost or reduced cost totaling \$1,500,000
- Direct employment associated with the facility - 26 employees, collection and hauling
- Other benefits resulting from the facility during the preceding calendar year – Reduce Waste Stream
