

Communications with Internal and External Audiences

- Internal
 - Environmental Bulletin Board

- Once a month the plant has a Steering Committee, as part of the committee there is an environmental handout which is reviewed. (Attached)
 - Each month there is an HSE bulletin put out with information. (Old copy attached)
 - There is a monthly environmental call with the key plants; these plants in turn contact the smaller plants in the area to be sure they have all the information they need. (Agenda attached)
 - E-mails are put out as major changes take place.
 - During the plant's Monthly Environmental and Safety Training information can be put out at that time for any new developments.
- External
 - Member of Virginia Manufacturing Association
 - Member of Hopewell Manufacturing Association (the Plant Manager is President)

Hopewell Cogeneration Facility

- Hopewell LEPC (Chuck Barnes has been a active committee member for over 12 years)
- Member of V-REMS for over 4 years
- Member of Business for the Bay for over 4 years
- Attended the Virginia Environmental Symposium (at VMI) since 2008
- Attended the EMS conference at Roanoke every year that it has been held.
- Been a VEEP member since 2005
- Attend OEM functions
 - Plant has attended Alstom Gas Turbine Conference almost every year since 1990
 - Committee on Low NOx burner assembly testing
 - Provided information on Bio-Diesel use, which is now being used in Hawaii blended with #6 oil; it has reduced SO₂, NO₂, Burns Cleaner, is all-over better for everyone
 - Nooter-Erickson Conferences on Waste Heat Boilers or Heat Recovery Steam Generators (HRSGs)
 - HCF will be using a CO₂ blasting process to clean the HRSGs in the spring of 2011. It is expected to increase the efficiency of the HRSG and provide the same amount of steam at a reduced fuel use by the gas turbines.
 - Member of a Combined Cycle Gas Turbine User Group
 - North America wide; this group goes into maintenance and plant improvements. Increases in efficiency, reduction in emissions, etc.
