

Hopewell Cogeneration Facility

Environmental Policy

The Environmental Policy is adopted from the parent company. Each year the policy is reviewed and signed by all plant personnel this is done so that all personnel at all plants subscribe to the same ideas as the parent company and each other. This year there was a merger with a company call International Power. The policy is be reviewed by they to see if there are any type of changes to reflect their comment to the environment. The updated policy is normally sent out in January-February; however, this year it is running late and the copy in the renewal is last years.

Also see Tab 2 of the EMS Manual in the last section of the renewal package.

GDF Suez Energy Generation NA Environmental Policy

GDF Suez Energy Generation NA, Inc., as an Operator of Power Generation Facilities and subsidiary of GDF Suez Energy North America, is accountable for all process activities carried out at its North American facilities including this site and is a responsible steward of the environment as it affects our employees, customers and society at large. Through conscientious and consistent management, we commit to:

- Operate our business to maintain compliance with all environmental standards set forth in our certificates, permits, applicable regulations and corporate objectives, and, wherever possible, we will strive to go beyond those applicable requirements.
- Promote awareness of environmental requirements through training, develop programs and procedures to ensure compliance, conduct periodic audits to measure our success, address findings expeditiously, and identify opportunities for continual improvement.
- Participate as an active and responsible member of the communities in which we live and work. We are committed to the continuous improvement of our operations. We will promote environmental awareness and maintain open communications with the community and employees concerning the environmental impact of our facilities.
- Effectively communicate the intent of this policy to all employees, contractors, customers, visitors, regulators, community and suppliers through Company-wide education and training programs.
- Establish objectives and consistently meet targets to reduce or minimize pollution and impacts on the environment as set forth in our Environmental Management System.
- Strive to reduce the short- and long-term environmental impact of our operations in accordance with the concept of sustainable development.
- Maintain a zero tolerance for environmental impairment in all we say and do. Our environmental outlook is global and our actions local.
