

Hopewell Cogeneration Facility

Setting Objects and Targets

The objectives are looked at from the significant aspects and impacts (See Tab 5 of the EMS Manual), and what the plant feels is worth looking at and improving upon. The objectives and targets are coordinated with the business plan. These objectives are placed on a form and then there is an update from (progress report) that is put out each month. See Tab 7 of the EMS Manual; procedures and examples of objectives and targets are displayed there.
