# 2013 Virginia Green Travel Star Awards Green Travel Leader

## Inn at Riverbend

The Inn at Riverbend is a seven room luxury bed and breakfast, situated on the New River. Inn at Riverbend uses only eco-friendly cleaning products, and this year has done away with plastic water bottles for guests. Instead we provide a BPA free reusable water bottle for guests to use here and take with them. We have added recycling bins in all the guest rooms, and encourage guests to use our recycling program. We separate out all of our recycling into bins and bring them to a recycling center.

We also compost all appropriate food waste and grow as much of our own vegetables and herbs as possible. We also harvest rain water in drums for use in our recycling pond/waterfall. We use CFL light bulbs throughout the Inn, and many lights are on timers. We also have Rinnai water heaters which help heat only the water that is needed at any given time, and we also adjust thermostats in all rooms that are unoccupied to reduce unnecessary power/energy use.
