2013 Virginia Green Travel Star Awards Green Travel Star

Green Campground of the Year

Williamsburg KOA

At the Williamsburg KOA, we are always implementing ways to keep it green. One of the most unique ways in which we stand out from others is the way we heat our pool. In the past, we utilized a traditional propane system and now have a green system in effect, which has cut costs dramatically and does not harm the environment. Fallen trees and branches are collected from our grounds and used to create the heat for our pool. We encourage our campers to be green as well. We have a recycling dumpster at the front of our campground for all to use. Furthermore, we give all campers hand outs upon check-in with tips on helping us keep it green at KOA. Tips include, but are not limited to, visiting local farmers markets for produce, keeping tires properly inflated, using certified green products (especially for holding tanks), choosing items for purchase with limited to no packaging, and bringing your own bags when shopping! We also carry certified green products for RVs at our camp store. We are doing our best to provide campers an environment free from chemicals while conserving the planet's resources. By reducing the carbon footprint through our wood burning heater, dusk to dawn technology, energy efficient machinery, recycled products, green products, and recycling, we help keep our planet beautiful.
