How many lbs of manure will this cow produce in a day?

Young animals need more water then adults, they need to drink more often and must be clean.

Livestock need clean water

- Lowers risk of parasites and diseases
- Improves animal's metabolism
- Promotes healthy growth

What is the most essential nutrient for sustaining life?

THE PARTNER OF

The Archwood Property
Phase 1-6 Completed
283 Acres of Open Pasture

How have these changes impacted the farming operations?

- *The cattle graze evenly around the entire pasture*
- *The grazed acres increase and are utilized more effectively*
- *While distributing their nutrients throughout the field*

Archwood Farm is continuously working on conservation projects to enhance the sustainability of the farms future for the generations to come.
