

A Technical Review Committee has been established to research information currently available regarding Coal Combustion By Product (CCB) reuse, available technical information regarding impacts of various methods for CCB reuses, and current regulatory requirements. Based on this review, the committee will provide the Technical Advisory Committee for Amendment 7 of the Virginia Solid Waste Management Regulations, 9 VAC 20-80 with recommendations on any regulatory changes necessary to provide for continued protection of human health and the environment. The committee held its first meeting on June 12, 2008. A second meeting is scheduled for August 13, 11 AM until 4 PM at the Piedmont Regional Office.
