

## **Appendix A**

### **Part 1A Fact Sheets**

#### **2002 303(d) Report on Impaired Waters**

#### **Virginia Department of Environmental Quality**

This appendix of the report contains fact sheets on each water listed in Part 1A of the Impaired Waters List. These fact sheets contain more detailed information on the locations, area or size, causes, and sources where known, of every impairment.

Fact sheets can be accessed for individual waters via the Internet at <http://www.deq.state.va.us/water/303d.html>. Navigate to the map of impaired waters and select a water of interest to you. Then you can link to the fact sheet for that water and read it on line or print it out for later use. Fact sheets can also be downloaded from the URL above. Due to the size of the electronic file, the fact sheets have been divided into separate downloads for each of the nine major river basins in Virginia. Hard copies of all fact sheets in any river basin can be requested from the Department of Environmental Quality.

Fact sheets for and a list of “Waters of Concern”, which are fully supporting waters previously called “threatened”, are also available via the Internet at the URL noted above.
