1. Euro-Composites owns and operates the Facility in Elkwood, Virginia. The Facility is an aramid honeycomb manufacturing facility.
2. The Facility is the subject of the Permit which allows Euro-Composites to modify and operate an aramid and aluminum honeycomb composite and manufacturing facility.
3. On August 4, 2010, Department staff conducted a Full Compliance Evaluation of the Facility to for compliance with the requirements of the Virginia Air Pollution Control Law, the Permit, and the Regulations. Based on the inspection, Department staff made the following observations:
 - a. The afterburner was not equipped with a device to record the inlet temperature of the ceramic cordierite honeycomb monolith catalyst. The afterburner is equipped with a

device to continuously monitor the inlet temperature at the catalyst; however, Facility staff reported that it was not currently set up to record the temperature as required by the Permit.

- b. Facility staff could not present a log demonstrating that the afterburner combustion chamber monitoring device is observed at least once per operational day.
 - c. Facility staff could not provide records for the hourly average of the combustion chamber temperatures or the daily reading from the monitoring device.
4. Condition 4 of the Permit requires that “The direct flame afterburner, and ceramic cordierite honeycomb monolith catalyst in the afterburner chamber is to be equipped with a device to continuously measure and record the inlet temperature of the ceramic cordierite honeycomb monolith catalyst... (9 VAC 5-80-1180(D) and 9 VAC 5-50-260).”
 5. Condition 5 of the Permit requires that “The direct flame afterburner combustion chamber temperature monitoring device shall be observed by the permittee for proper operation, with a frequency of not less than once per operational day or as recommended by the manufacturer... Such observations shall be logged, and records maintained by permittee... (9 VAC 5-50-50(H)).”
 6. Condition 16(g) of the Permit requires the permittee to maintain “Records of the combustion chamber temperature monitoring device readings for the hourly averages as required in Condition 4, as well as the daily observed readings as required in Condition 5... (9 VAC 5-80-1180 and 9 VAC 5-50-50).”
 7. On September 1, 2010, based on the inspection and follow-up information, the Department issued a Notice of Violation to Euro-Composites for the violations described in paragraphs C2 through C5, above.
 8. On September 9, 2010, Euro-Composites submitted a written response to the NOV.
 9. Based on the results of the August 4, 2010, inspection and the documentation submitted on September 9, 2010, the Board concludes that Euro-Composites has violated Permit Conditions 4, 5, and 16g, in accordance with 9 VAC 5-50-50, 9 VAC 5-50-50(H), 9 VAC 5-50-260, 9 VAC 5-80-1180, and 9 VAC 5-80-1180(D), as described in paragraphs C2 through C5, above.
