SECTION C: Findings of Fact and Conclusions of Law

1. Empire is operator of the Crewe, Rocky Mount, and Victoria Facilities. Empire stores a regulated substance in the form of gasoline in USTs at each of these facilities.

Crewe Facility

2. On June 27, 2011, Department staff inspected the Crewe Facility to evaluate Empire's compliance with the requirements of the State Water Control Law and the Regulations. At that time, there were two active 8,000-gallon USTs at the Crewe Facility. The USTs contain petroleum in the form of gasoline. DEQ staff observed the following:
 - a. Documentation was unavailable to demonstrate recent compliance with release detection requirements for the active USTs.
 - b. Financial responsibility had not been demonstrated based on review of the current documentation.
3. On November 29, 2011, DEQ issued Warning Letter No. WL-11-11-BRRO-L-007 to Empire for the violations at the Crewe Facility listed in paragraph C(2) above.
4. On June 6, 2012, the Department issued Notice of Violation No. NOV-12-03-BRRO-L-002 to Empire for violations at the Crewe Facility listed in paragraph C(2), above.

Rocky Mount Facility

5. On March 26, 2012, Department staff inspected the Rocky Mount Facility to evaluate Empire's compliance with the requirements of the State Water Control Law and the Regulations. At that time, there were three active USTs at the Rocky Mount Facility: one 8,000-gallon UST and two 6,000-gallon USTs. The active USTs contain petroleum in the form of gasoline. DEQ staff observed the following:
 - a. Documentation was unavailable to demonstrate recent compliance with release detection requirements for the active USTs. The Automatic Tank Gage ("ATG") system used at the Rocky Mount Facility was not providing consistent passing leak tests.
 - b. Financial responsibility had not been demonstrated based on review of the current documentation.
6. On June 6, 2012, the Department issued Notice of Violation No. NOV-12-04-BRRO-L-003 to Empire for violations at the Rocky Mount Facility listed in paragraph C(5), above.

Victoria Facility

7. On June 27, 2011, Department staff inspected the Victoria Facility to evaluate Empire's compliance with the requirements of the State Water Control Law and the Regulations. At that time, there were three USTs at the Victoria Facility: one 10,000-gallon gasoline UST and two 5,000-gallon gasoline USTs. DEQ staff observed the following:

- a. Documentation was unavailable to demonstrate recent compliance with release detection requirements.
 - b. Financial responsibility had not been demonstrated based on review of the current documentation.
8. On November 29, 2011, DEQ issued Warning Letter No. WL-11-11-BRRO-L-008 to Empire for the violations at the Victoria Facility listed in paragraph C(7) above.
9. On June 6, 2012, the Department issued Notice of Violation No. NOV-12-03-BRRO-L-001 to Empire for violations at the Victoria Facility listed in paragraph C(7), above.
10. 9 VAC 25-580-120(2) and (3) requires owners and operators of UST systems to maintain documentation of corrosion protection equipment, documentation of UST system repairs, documentation of recent compliance with release detection requirements, results of the site investigation conducted as permanent closure, and make these records immediately available for inspection or readily available at an alternative site and be provided for inspection upon request.
11. 9 VAC 25-580-180(2) requires that the results of any sampling, testing or monitoring required under the Regulations be maintained for at least one year.
12. 9 VAC 25-590-40(A) requires an owner or operator to demonstrate financial responsibility for taking corrective action and compensating third parties for bodily injury and property damage caused by accidental releases arising from the operation of petroleum underground storage tanks.
13. 9 VAC 25-590-150(E) requires an owner or operator to submit evidence of financial assurance as described in 9 VAC 25-590-160.
14. 9 VAC 25-590-160 requires an owner or operator to maintain evidence of all financial assurance mechanisms used to demonstrate financial responsibility.
15. On June 1, 2012 DEQ's Office of Financial Assurance issued a letter to Empire Petroleum Partners, LLC approving the Financial Responsibility mechanisms for each of its Virginia facilities, including the Victoria, Crewe, and Rocky Mount Facilities.
16. In a phone conversation on June 13, 2012, Department staff discussed the NOVs for each facility with a representative of Empire. During this conversation, the Empire representative agreed to submit a written response to the NOVs.
17. On June 18, 2012, Empire submitted a written response to the NOVs. The response included documents to demonstrate recent compliance with release detection requirements in the form of Statistical Inventory Reconciliation ("SIR") reports for the Victoria Facility from May 2011 through April 2012 and SIR reports for the Crewe Facility from September 2011 through April 2012. Results were inconclusive at the

Crewe Facility for the regular unleaded gasoline tank from January through April 2012. The response indicated that Empire had commenced performing release detection at the Rocky Mount Facility with the SIR method instead of the ATG method as of June 1, 2012. For the Rocky Mount Facility, the response also included documentation of tank and line testing and a copy of a SIR agreement with a contractor.

18. Based on the results of June 27, 2011 inspection at the Crewe Facility, the June 27, 2011 inspection at the Victoria Facility, the March 26, 2012 inspection at the Rocky Mount Facility, and the documentation submitted on June 18, 2012, the Board concludes that Empire has violated 9 VAC 25-580-120(2) and (3), 9 VAC 25-580-180(2), 9 VAC 25-590-40(A), 9 VAC 25-590-150(E), and 9 VAC 25-590-160, as described in paragraphs C(10) through C(14), above.
19. In order for Empire to complete its return to compliance, DEQ staff and representatives of Empire have agreed to the Schedule of Compliance, which is incorporated as Appendix A of this Order.

SECTION D: Agreement and Order

Accordingly, by virtue of the authority granted it in Va. Code §§ 62.1-44.15, the Board orders Empire, and Empire agrees to:

1. Perform the actions described in Appendix A of this Order; and
2. Pay a civil charge of \$4,052.00 within 30 days of the effective date of the Order in settlement of the violations cited in this Order.

Payment shall be made by check, certified check, money order or cashier's check payable to the "Treasurer of Virginia," and delivered to:

Receipts Control
Department of Environmental Quality
Post Office Box 1104
Richmond, Virginia 23218

Empire shall include its Federal Employer Identification Number (FEIN) (45-2540158) with the civil charge payment and shall indicate that the payment is being made in accordance with the requirements of this Order for deposit into the Virginia Petroleum Storage Tank Fund (VPSTF). If the Department has to refer collection of moneys due under this Order to the Department of Law, Empire shall be liable for attorneys' fees of 30% of the amount outstanding.

Nothing herein shall affect appropriate enforcement actions by any other federal, state, or local regulatory authority.

Empire shall demonstrate that such circumstances were beyond its control and not due to a lack of good faith or diligence on its part.
