Solid Waste Managed in Virginia During Calendar Year 2019

EXECUTIVE SUMMARY

Section 10.1-1413.1 of the Code of Virginia requires the Department of Environmental Quality (DEQ) to prepare a report by June 30 of each year describing the amount of solid waste disposed of in the Commonwealth during the preceding calendar year. Facilities that have solid waste management permits are required to provide DEQ with information to prepare this report. As of May 6, 2020, 205 permitted facilities provided information on their activities for calendar year 2019 for this report.

Based on the facilities' reports, a total of 22,530,150.85 tons of solid waste was received at Virginia's permitted solid waste management facilities during calendar year 2019. Of this total, 16,745,894.34 tons originated in the Commonwealth and 5,784,256.50 tons originated from other jurisdictions. The total amount of solid waste received increased by 3.32% or 724,725.32 tons compared to 2018.

Municipal solid waste (MSW) constituted 14,266,532.21 tons of the total amount of solid waste received during calendar year 2019. Of the total MSW received, 10,042,401.97 tons originated in the Commonwealth and 4,224,130.24 tons originated from other jurisdictions.

Five jurisdictions accounted for 96.96% of all waste received from out-of-state sources: Maryland (41.20%); Washington, D.C. (16.68%); New York (16.39%); New Jersey (16.25%); and North Carolina (6.44%).

During calendar year 2019, the total solid waste received from out-of-state increased by 13.33%. MSW received from out-of-state increased by 9.64% compared to 2018 amounts. Construction/demolition/debris (CDD) decreased by 15.56% and industrial waste increased by 42.8% compared to 2018 amounts. Total out-of-state solid waste increased due to a 42.8% increase in out-of-state industrial waste from 419,656.62 in 2018 to 599,287.85 tons in 2019. For waste originating in Virginia during the same period, the total solid waste, MSW, and CDD waste received increased by 0.27%, 0.39%, and 3.29% respectively compared to 2018 amounts. Industrial waste decreased by 11.23% compared to 2018.

Of the solid waste managed in Virginia during the year, 73.21% or 13,814,420.75 tons were landfilled onsite, 11.67% or 2,201,817.23 tons were incinerated onsite, and the rest was managed by other means (see Table 18). Of all solid waste received at Virginia facilities during the year, 63.32% was MSW, 19.43% was CDD waste, 6.22% was industrial waste and the remainder was other types of waste (see Table 19).

Permitted solid waste management facilities reported that 7.50% of the waste they managed was diverted from disposal by recycling or mulching; 1.06% of the total waste managed was composted.

Permitted facilities are required to report on their available capacity and the expected life of the facilities based on current disposal rates. This information shows that at current rates, the remaining available landfill capacity is as follows: MSW – 20.6 years; CDD – 21.4 years; and non-captive industrial – 16.9 years. These projections do not account for population increases, changes in waste generation, or the closing of older MSW disposal units pursuant to statute.

At the option of the facility owner, Virginia Code § 10.1-1413.1 provides that the data collected may include an accounting of the facility's economic benefits to the locality where the facility is located. No facilities provided such information for calendar year 2019.

I. Introduction

This report has been prepared in accordance with Virginia Code § 10.1-1413.1, which requires DEQ to prepare a report by June 30 of each year describing the amount of solid waste disposed of in the Commonwealth during the preceding calendar year. All permitted facilities (except for captive waste management facilities) that treat, store or dispose of solid waste are required to provide DEQ with information in their possession as is reasonably necessary for DEQ to prepare this report. The requirements for reporting are set forth in the Virginia Administrative Code, 9 VAC 20-81-80.

II. Reporting Procedures

For each category of solid waste, permitted solid waste facilities in Virginia were asked to report the amount of waste that they received, amount of waste mined¹, the method by which the waste was managed, the jurisdiction where the waste originated, if known, and the facility's remaining capacity. A copy of the reporting table, DEQ Form 50-25, for providing information to DEQ is provided as Attachment 1.

The facilities identified amounts of solid waste by each of the following categories:

- municipal solid waste (MSW)
- construction/demolition/debris (CDD)
- industrial waste
- regulated medical waste (RMW)
- vegetative and yard waste (VW/YW)
- incineration ash
- sludge other than land applied in accordance with Virginia Code 62.1-44.19:3
- tires
- white goods (e.g., refrigerators, washing machines)
- friable asbestos
- petroleum-contaminated soil (PCS)
- other waste

The facilities also reported on each of the following methods of waste management:

- recycled onsite
- composted onsite
- landfilled onsite
- incinerated onsite
- sent offsite to be recycled
- sent offsite to be treated, stored or disposed
- stored onsite at the beginning of the reporting period
- stored onsite at the end of the reporting period
- mulched
- other

¹ Landfill mining is the excavation of previously landfilled materials.

Facilities submit this data online or by paper copy to the appropriate DEQ Regional Office. Facilities may log online at the Virginia Solid Waste Information and Assessment (SWIA) webpage to submit data at <https://www.deq.virginia.gov/Programs/LandProtectionRevitalization/SolidHazardousWasteRegulatoryPrograms/SolidWaste/SolidWasteInformationandAssessmentProgram.aspx>.

For the facilities that provided information, 4.88% (10 facilities) submitted paper copies and 95.12% (195 facilities) submitted the information online.

This report does not include the waste management activities from captive waste management facilities because they are statutorily exempt from the reporting requirements. A captive facility is one that is located on property owned or controlled by the generator of the waste. Most captive waste management facilities in Virginia are industrial landfills or regulated medical waste facilities. As a result, the reported amounts of industrial waste, regulated medical waste and sludge represent only the portion that is managed in off-site facilities. In addition, this report does not reflect tires managed under the Waste Tire Trust Fund at facilities that do not require a permit.

III. Receipt of Assessment Reports

By regulation, facilities must submit their reportable data by March 31 each year. Facilities are required to submit a separate reporting table for each jurisdiction from which they received waste during the prior year. Information from reporting tables received on or before May 6, 2020, has been included in this report. For 2019, 205 permitted facilities reported their activities. These facilities submitted 343 separate reporting tables, representing waste received from 25 states and jurisdictions (including Virginia and Washington, D.C.). Last year, 202 facilities reported their activities for 2018.

IV. Discussion of Reported Waste Management Activities and Capacity Information

Table 1 shows how the total solid waste received was managed by all facility types.² Table 2 lists the jurisdiction of origin of waste. Tables 3, 5, and 7 show how Municipal Solid Waste Sanitary Landfills, Construction/Demolition/Debris Landfills, and Industrial Landfills managed solid waste.³

Tables 9 – 17 show how other facility types (Incinerators, Transfer Stations, Material Recovery Facilities (MRF), Composters, and Regulated Medical Waste) managed the waste they received and a list of submitting facilities. Table 18 shows how the total waste stream was managed and Table 19 shows the composition of the total waste stream.

Permitted facilities that treat, store or dispose of solid waste are required to report the available capacity, expected life and current disposal rates. The remaining capacity and life, and a list of submitting facilities

² When referring to information from Table 1, “waste received” refers to information from the first column, and “waste managed” refers to information from the remaining columns on Form DEQ 50-25 except “mined materials” or as noted. The amount of waste “received” for each type of waste may not match the sum of the reported amounts identified for each method of waste management. This reflects information as submitted by facilities in the reporting tables. In particular, incinerators may properly include the ash that they generate as waste that is “sent offsite,” and not include it as waste that is “received” at that facility.

³ Some columns and rows found in Table 1 do not appear in some of these tables. Rows and columns that do not have reported data were not used by any of the reporting entities; *i.e.* MSW Landfills do not incinerate waste so the column is not included; MSW landfills do not accept regulated medical waste so the row is not included.

are in Tables 4, 6, and 8. ⁴ Calculations for remaining years of landfill capacity do not account for population changes, changes in waste generation, or the future closings of older MSW disposal units under Virginia Code § 10.1-1413.2. Also, calculations do not include facilities that have not been built and are not accepting waste for which permits may have been issued.

Figure 1 compares the total amount of waste received from 2011 through 2019 at facilities from Virginia and out-of-state jurisdictions. Figure 2 compares municipal solid waste received from 2011 through 2019 from Virginia and out-of-state sources.

V. Reports of Economic Benefits

At the option of the facility owner, Virginia Code § 10.1-1413.1 provides that the data collected may include an accounting of the facility's economic benefits to the locality where the facility is located. This may include the value of disposal and recycling facilities provided to the locality at no cost or reduced cost, direct employment associated with the facility, and other economic benefits resulting from the facility during the preceding calendar year. No facilities provided such information for 2019.

VI. Waste Diversion and Recycling

SWIA data is collected from solid waste permitted facilities. Facilities submit the total tonnage received and how the amounts were managed (landfilled, mined, recycled onsite, recycled offsite, mulched, incinerated, other, composted, or stored). Permitted solid waste management facilities reported that 7.50% (1,415,854.58 tons) of the total waste they managed was diverted from disposal by recycling or mulching. Facilities composted 1.06% (199,461.85 tons) of the total waste managed. Table 20 shows for each SWIA category of waste the total amount of Virginia and out-of-state waste managed, total amount diverted and how the material was managed. In addition, Tables 3, 5, 7, 9, 11, 13, and 15 show how the various facility types managed the waste types.

Most recycling occurs at facilities other than permitted waste management facilities. Local governments provide more complete information on the recycling of waste generated in Virginia. For more detailed information about recycling rates in Virginia see Calendar Year 2018 Virginia Annual Recycling Rate Report:

<http://www.deq.virginia.gov/Programs/LandProtectionRevitalization/RecyclingandLitterPreventionPrograms.aspx>. The annual recycling report for calendar year 2019 will be issued later this year.

⁴ Facilities report available capacity in cubic yards. The available capacity is estimated using the following conversion factors: 1,000 lbs. of MSW = 1 cu. yd.; 1,200 lbs. of CDD waste = 1 cu. yd.; and 1,000 lbs. of industrial waste = 1 cu. yd. The available capacity for individual facilities may vary, depending on factors such as a facility's compaction rate and use of daily cover materials.

Table 1 – Solid Waste Managed in Virginia for All Reporting Facilities in Tons – 2019

Waste Type	Total Waste Received ⁵	Mined Materials	Landfilled Onsite	Recycled Onsite ⁶	Composted Onsite	Incinerated Onsite	Mulched Onsite	Other Onsite ⁷	Recycled Offsite	Treated, Stored, Disposed Offsite	Stored Onsite at Beginning of Year	Stored Onsite at End of Year
Municipal Solid Waste	14,266,532.21	166,523	8,746,397.38	855.19	1,189.16	2,186,963	0	144,500.00	114,717.99	3,237,073.80	17,220.09	16,632.60

Sludge	250,206.91	0	231,752.29	0	17,140	0	0	0	0	1,314.86	0	0
Tires	109,912.42	0	611.18	54,282.93	0	0	0	3,229	44,271.62	6,892.56	2,792.73	3,418.30
White Goods	27,660.45	0	0	591	0	0	0	0	26,831	57.48	202	383
Friable Asbestos	5,936.35	0	5,926.07	0	0	0	0	0	0	11.22	5.44	4.50
Regulated Medical Waste	5,360.31	0	0	0	0	0	0	364	0	4,995.91	3	3
Total for 2019	22,530,150.85	166,522.67	13,814,420.75	337,729.35	199,461.85	2,201,817.23	222,287.79	379,438.01	855,837.44	5,109,971.58	733,090.71	857,579.62
Total for 2018	21,805,425.52	180,040.95	13,084,657.57	619,659.56	185,192.40	2,217,914.23	246,236.21	462,195.05	734,033.87	4,935,868.53	634,483.11	719,743.83

⁵ The amount of “Total Waste Received” and “Stored Onsite at Beginning of Year” may not precisely match the sum of the reported amounts for the remaining columns (i.e., each method of managing the waste). This difference reflects information submitted in the reporting tables. In particular, incineration ash generated by an energy recovery facility or incinerator may be listed as “sent offsite to be treated, stored, or disposed” even though it was not received as ash at that facility. The total waste managed may be greater than the waste received due to ash generated at a facility. Vegetative/Yard Waste may be composted to produce a product that is not managed as a waste.

⁶ The majority of recycling takes place at facilities that do not require a permit from the Department and were not required to submit data for this report. Therefore, the amounts shown in this column represent a substantial underestimate of the true recycling rate in the Commonwealth. Table 20 provides more information. The annual recycling rate report for calendar year 2019 will be issued later this year.

⁷ “Other Onsite” methods of management may include steam sterilization of medical waste, approved use of shredded tires, and thermal treatment of petroleum contaminated soils, among others.

Table 18 – Methods of Solid Waste Management (in Tons) – 2019

Methods of Solid Waste Management	2019 Tons	Percentage
Landfilled Onsite	13,814,420.75	73.21%
Incinerated Onsite	2,201,817.23	11.67%
Stored Onsite End of Year	857,579.62	4.55%
Sent Offsite to be Recycled	855,837.44	4.54%
Other	379,438.01	2.01%
Recycled Onsite	337,729.35	1.79%
Mulched	222,287.79	1.18%
Composted Onsite	199,461.85	1.06%
Total	18,868,572.04	100.00%

Note: The basis for determining these percentages is the sum for all methods of waste management (recycled, composted, landfilled, etc.) in Table 1, with the exception of: (1) waste stored onsite at the beginning of the year (which is similar to waste received) and (2) waste that was sent offsite for treatment, storage or disposal (i.e., waste that was simply transferred to another facility for ultimate management). Accounting for those two exceptions, the basis for these percentages is 18,868,572.04 tons. Facilities that mine landfill materials report how much material was mined and how it was managed.

Table 19 – Composition of the Solid Waste Stream in Tons – 2019

Waste Type	2019 Tons	Percentage
Municipal Solid Waste	14,266,532.21	63.32%
Construction/Demolition/Debris	4,377,177.57	19.43%
Industrial Waste	1,401,473.14	6.22%
Other Waste	794,587.47	3.53%
Incineration Ash	606,234.18	2.69%
Vegetative/Yard Waste	434,827.82	1.93%
Petroleum Contaminated Soil	250,242.03	1.11%
Sludge	250,206.91	1.11%
Tires	109,912.42	0.49%
White Goods	27,660.45	0.12%
Friable Asbestos	5,936.35	0.03%
Regulated Medical Waste	5,360.31	0.02%
Total	22,530,150.85	100.00%
