

County of York

Current Goals

- Reduce Air Emissions
- Waste Reduction
- Energy
- Water Discharge

Reduce Emissions from County Vehicles

- **Description:**
 - Vehicle fleet has undergone multiple modifications including, monitoring of vehicle usage, restrictions on idling, enforcing the speed limits and replacing older vehicles with hybrids
- **Results:**
 - Annual cost savings \$400 per vehicle

Energy Star Portfolio Manager

- **Description:**
 - Monthly monitoring, reporting and comparisons to historical energy data used to ensure that buildings run at a high efficiency and though using ENERGY STAR Portfolio Manager can easily pinpoint when energy consumption changes which can identify potential problem
- **Results:**
 - 168.78 MMBtu of energy conserved

Stormwater Quality Improvement Projects

- **Description:**
 - Several thousand feet of stream restoration projects and 5 storm water ponds under design
- **Future Plans:**
 - Thousands of additional feet of stream restoration programmed for design within the next five years
