RE: Rives Road Solar, LLC

Location: Prince George County
Registration No.: 2018-S07

Dear Mr. Niemann:

The Department of Environmental Quality (DEQ), after consultation with the Department of Historic Resources (DHR), the Department of Game and Inland Fisheries (DGIF), and the Department of Conservation and Recreation (DCR), has completed its review of the supplemental information submitted in support of the 2018 application by New Energy Ventures, Inc. (NEV) for Rives Road Solar, LLC for coverage under the Small Renewable Energy Project (Solar) Permit by Rule, 9VAC15 Chapter 60. DEQ determines that the application, including any Supplemental Information including but not limited to the Application Update received 1-8-19, DCR Biotics Data Analysis received 12-26-18, and Final Rives Road Phase II Archaeological Report received 12-12-2018 satisfies the requirements of 9VAC15-60-30 provided that New Energy Ventures complies with the following:

- All commitments referenced within the Application Documents and any Supplemental Information documents;
- Submission of signed Final Interconnection Agreement;

- Submission as soon as practicable of final post-construction site map according to 9VAC15-60-70 A, and;
- Removal of all trees in accordance with the requirements of DGIF and the United States Fish and Wildlife Service (USFWS) to protect indigenous bat species as set forth in the DGIF guidelines and guidance found at:
 - <https://www.dgif.virginia.gov/environmental-programs/environmental-services-section/>
 - <https://www.dgif.virginia.gov/wildlife/bats/northern-long-eared-bat-application/>
 - <http://www.dgif.virginia.gov/wildlife/bats/little-brown-bat-tri-colored-bat-winter-habitat-roosts-application/>
 - <http://www.dgif.virginia.gov/wp-content/uploads/VDGIF-Time-of-Year-Restrictions-Table.pdf>

Based upon compliance with the conditions stated above, authority is hereby granted to NEV to construct and operate Rives Road; a photovoltaic project in Prince George County, located at 3513 and 3701 Rives Road and known as Tax Maps 330(A)00-024-0 and part of 025-0, southeast of the intersection of Route 629 and Interstate 295 on roughly 146.5 acres; with a cumulative total generating capacity of 19.7 MW AC, in accordance with all Application Documents, Supplemental Information and this letter of approval.

This authorization for construction and operation shall not relieve NEV of the responsibility to comply with all other applicable local, state and federal statutes and regulations, including but not limited to strict adherence to applicable state and local erosion and sediment control/storm water management laws.

In addition, DEQ strongly encourages NEV to incorporate the DCR Recommended Actions listed below:

- Use of appropriate seed mix/plants and seasonal mowing developed in consultation with DCR;
- Development of a monitoring and control plan for invasive species;
- The planting of native pollinator plants in the buffer areas of the planned facility, and;
- Minimizing habitat fragmentation by leaving round versus long, skinny natural cover and forest land fragments; retaining connective corridors

that allow significant wildlife migration between fragments and designing the intervening landscape to benefit habitat; natural cover as opposed to turf grass and mowed lawn.

NEV must notify Mary E. Major, DEQ Office of Renewable Energy Permitting, of the actual date on which construction of the solar project commences and the date of operation as soon as practicable. A notification to DEQ must be made 30 days prior to any transfer of ownership or operation according to the provisions of 9VAC15-60-100 A.

Please note that if NEV is later found by the DEQ not to qualify for coverage under the terms and conditions of the Solar Permit By Rule, then NEV could be subject to action under the enforcement provisions of the Solar Permit By Rule (9VAC15-60-140) for operation without a permit.

As provided by Rule 2A:2 of the Supreme Court of Virginia, you have 30 days from the date of the service of this decision to initiate an appeal of this decision, by filing notice with:

David K. Paylor, Director
Virginia Department of Environmental Quality
ATTN: Office of Renewable Energy Permitting
Post Office Box 1105
Richmond, Virginia 23218

In the event this decision is served to you by mail, three days will be added to that period. Please refer to Part Two of the Rules of the Supreme Court of Virginia, which describes the required content of the Notice of Appeal, including specification of the Circuit Court to which the appeal is taken, and additional requirements governing appeals from decisions of administrative agencies.

If you have any questions concerning this authorization under the Small Renewable Energy Project Permit By Rule, please contact Mary E. Major at 804-698-4423.

Sincerely,

Michael G. Dowd
Director, Air and Renewable Energy Division
