Re: Chesapeake Energy Center's Application for VPDES Permit Modification (VA 0004081)

Dear Mr. Golden:

In your September 13, 2016, letter you indicated that because of changes in our implementation of the bottom ash pond and landfill closures at the Chesapeake Energy Center that eliminate the need for associated discharges to surface water, the Virginia Department of Environmental Quality believes that Dominion's application for a VPDES permit modification currently being processed should be withdrawn. In light of these changes, Dominion withdraws its VPDES permit modification application from further consideration by the agency.

Please contact me with any questions concerning this notification at (804) 273-2929.

Sincerely,

Cathy C. Taylor
Senior Environmental and Sustainability Advisor
