

This is a notice for the first meeting of the Stakeholder Advisory Committee (SAC) for development of the Salt Management Strategy (SaMS). Total Maximum Daily Loads (TMDLs) for chloride associated with salt application from snow and ice management have been developed for the Accotink Creek watershed, located in Fairfax County and the City of Fairfax. These TMDLs are currently in the approval process. The SaMS is intended to assist in the implementation of the Accotink Creek chloride TMDLs. The SaMS aims to prepare a strategy that is capable of achieving the target chloride (salt) loads identified in the Accotink Creek TMDLs and that proactively addresses salt application in the broader surrounding region. The project area for the SaMS includes Arlington, Fairfax, Loudoun, and Prince William counties and the cities of Alexandria, Manassas, Manassas Park, Falls Church, and Fairfax. For more information on the SaMS visit <http://www.deq.virginia.gov/SaMS.aspx>.

The purpose of this first SAC meeting is to present the framework for the SaMS and its development process and discuss the intended goals and objectives for this project. If you have any questions regarding the SAC, this meeting, or the SaMS project, please contact Dave Evans via phone, email, or conventional mail using the information listed at the bottom of this notice. All meeting materials related to this project will be posted on the DEQ website at: <http://www.deq.virginia.gov/SaMS/MeetingMaterials.aspx>

**The first SAC meeting will be held:**

**Tuesday, February 27, 2018 from 1:00 p.m. to 3:00 p.m.**  
**Northern Virginia Regional Commission**  
**3040 Williams Drive, Suite 200**  
**Fairfax, VA 22031**
