

This is a notice for the third meeting of the Government Coordination Workgroup, which is tasked with providing recommendations for the Northern Virginia Salt Management Strategy (SaMS) related to government processes and operations. A chloride TMDL has been developed for the Accotink Creek watershed located in Fairfax County and the City of Fairfax. Additionally, water quality patterns throughout the Northern Virginia region show that the chloride pollution issues observed in the Accotink Creek watershed are not isolated to that watershed, but instead widespread throughout the region. Therefore, the Virginia Department of Environmental Quality (DEQ) in partnership with a broad coalition of stakeholders that make up SaMS Stakeholder Advisory Committee have begun the development of a comprehensive strategy that aims to provide recommendations for more efficient and effective use of salts during winter weather management.

The purpose of this meeting is to discuss opportunities to use existing or new forums of Northern Virginia regional government agencies to promote implementation of SaMS, share information, and offer mutual assistance. In this meeting, workgroup members will consider the draft recommendations prepared by other SaMS workgroups and discuss and recommend ways that collaboration among area governments can advance their implementation.

If you have any questions regarding the Government Coordination Workgroup, this meeting, or SaMS, please contact David Evans via phone, email, or conventional mail using the information listed at the bottom of this notice. All materials related to this project will be posted on the DEQ website at: <https://www.deq.virginia.gov/SaMS/MeetingMaterials.aspx>

The Third Government Coordination Workgroup meeting will be held:

Wednesday Dec. 18, 2019 from 1:00 p.m. to 3:30 p.m.
Northern Virginia Regional Commission
3040 Williams Dr
Suite #200
Fairfax, VA 22031
