

This is a notice for the fourth meeting of the Non-Traditional Best Management Practices Workgroup, which is tasked with developing recommendations related to best practices for salt use in winter weather maintenance as part of the development of the Salt Management Strategy (SaMS). A chloride TMDL has been developed for the Accotink Creek watershed located in Fairfax County. Additionally, water quality patterns throughout the Northern Virginia region show that the chloride pollution issues observed in the Accotink Creek watershed are not isolated to that watershed, but instead widespread throughout the region. Therefore, the Virginia Department of Environmental Quality (DEQ) in partnership with a broad coalition of stakeholders that make up the SaMS Stakeholder Advisory Committee have begun the development of a comprehensive strategy that aims to provide recommendations for more efficient and effective use of salts during winter weather management.

The purpose of this meeting is to report on follow-up items from the last meeting and to finalize the workgroup's recommendations for the SaMS.

If you have any questions regarding the Non-Traditional Best Management Practices Workgroup, this meeting, or the SaMS, please contact Sarah Sivers via phone, email, or conventional mail using the information listed at the bottom of this notice. All materials related to this project will be posted on the DEQ website at: <https://www.deq.virginia.gov/SaMS/MeetingMaterials.aspx>

The fourth Non-Traditional Best Management Practices Workgroup meeting will be held:

Thursday, January 23, 2020 from 1:00 p.m. to 3:30 p.m.
Northern Virginia Regional Commission
3040 Williams Dr
Suite #200
Fairfax, VA 22031

In case of inclement weather, the alternate meeting date will be Tuesday, January 28, 2020 from 1:00 p.m. to 4:00 p.m. in the same location. Please note that if Fairfax County schools are closed on Tuesday due to inclement weather, the meeting will be postponed to this alternate date.
