

APPENDIX 1 INTEGRATED LIST OF ALL WATERS

Purpose of the Integrated List

In the 2004 303(d) Impaired Waters Report, Virginia categorized assessed waters in an integrated format for the first time. Virginia has worked closely with the United States Environmental Protection Agency (EPA) to develop an Integrated Report that meets the current EPA assessment guidance and is also representative of the monitoring program and assessment methodology used in Virginia.

The 2016 Integrated List is a general list of all assessed surface waters in Virginia derived from an EPA database known as the Assessment Database (ADB). A description of each of the 2016 assessment categories and sub-categories used in ADB can be found below. They include both EPA-defined categories and Virginia-defined subcategories agreed to by EPA through their review of DEQ guidance for the 2016 water quality assessment. DEQ draft guidance, describing the various assessment methodologies, was released in January 2016, revised in response to EPA and public comment, and finalized in April 2016. The 2016 305(b)/303(d) Water Quality Assessment Guidance Manual can be found on the DEQ water quality [website](#).

The Integrated List uses the highest numbered category that applies to all of the assessed designated uses for a given segment. For instance, if a water is assessed as category 5A for the aquatic life use but attains all other assessed uses, the water is categorized as category 5A. Impaired waters fact sheets provide details about individual segments in Category 5. These fact sheets can be found at the aforementioned website.

Assessed waters in the Virginia 2016 Integrated List were placed in one of the following categories and subcategories:

FULLY SUPPORTING - Waters are supporting one or more designated uses

- **EPA Category 1** - Attaining all associated designated uses and no designated use is threatened.
 - Va. Category 1A** - waters are attaining all uses and a TMDL has been developed for one or more uses.
- **EPA Category 2** - Available data and/or other information indicate that some, but not all of the designated uses are supported.
 - Va. Category 2A** - waters are supporting all of the uses for which they are monitored.
 - Va. Category 2B** - waters are of concern to the state but no water quality standard exists for a specific pollutant, or the water exceeds a state screening value or toxicity test.
 - Va. Category 2C** - waters are now attaining the use(s) for which they were originally 303(d) listed and the TMDL is EPA approved but other applicable use(s) were not monitored and assessed.

INDETERMINATE - Waters needing additional information

- **EPA Category 3** - Insufficient data and/or information to determine whether any designated uses are met.
 - Va. Category 3A** - no data are available within the data window of the current assessment to determine if any designated use is attained and the water was not previously listed as impaired.
 - Va. Category 3B** - some data exists but it is insufficient to determine support of any designated uses. Such waters will be prioritized for follow up monitoring.

Va. Category 3C - data collected by a citizen monitoring or other organization indicate water quality problems may exist but the methodology and/or data quality has not been approved for a determination of support of designated use(s). These waters are considered as having insufficient data with observed effects. Such waters will be prioritized by DEQ for follow up monitoring.

Va. Category 3D - data collected by a citizen monitoring or other organization indicate designated use(s) are being attained but the methodology and/or data quality has not been approved for such a determination.

IMPAIRED - Waters are impaired or threatened but a TMDL is not required

- **EPA Category 4A** - water is impaired or threatened for one or more designated uses but does not require a TMDL because the TMDL for specific pollutant(s) is complete and US EPA approved.
- **EPA Category 4B** - water is impaired or threatened for one or more designated uses but does not require the development of a TMDL because other pollution control requirements (such as VPDES limits under a compliance schedule) are reasonably expected to result in attainment of the water quality standard by the next reporting period or permit cycle.
- **EPA Category 4C** - water is impaired or threatened for one or more designated uses but does not require a TMDL because the impairment is not caused by a pollutant and/or is determined to be caused by natural conditions.

Va. Category 4D - part(s) of a water quality standard is attained for a pollutant with a TMDL, but the remaining criteria for the standard were not assessed due to insufficient information. (Only to be applied to dissolved oxygen in tidal waters of the Chesapeake Bay).

IMPAIRED - Waters are impaired or threatened and require a TMDL

- **EPA Category 5 - Waters are impaired or threatened and a TMDL is needed.**

Va. Category 5A - a water quality standard is not attained. The water is impaired or threatened for one or more designated uses by a pollutant(s) and requires a TMDL (303d list).

Va. Category 5B - the water quality standard for shellfish use is not attained. One or more pollutants causing impairment require TMDL development.

Va. Category 5C - the water quality standard is not attained due to “suspected” natural conditions. The water is impaired for one or more designated uses by a pollutant(s) and may require a TMDL (303d list). Water quality standards for these waters may be re-evaluated due to the presence of natural conditions.

Va. Category 5D - a water quality standard is not attained where TMDLs for a pollutant(s) have been developed, but one or more pollutants are still causing impairment requiring additional TMDL development.

Va. Category 5E - effluent-limited waters receiving discharges from facilities not expected to meet compliance schedules by next permit cycle or reporting period.

Va. Category 5F - the water quality standard is attained for a pollutant(s) with a TMDL and 303(d) delisting approved, but the water remains impaired for additional pollutant(s) requiring TMDL development.

Va. Category 5R - the Water Quality Standard is not attained and the water is impaired, and

implementation of an EPA-approved restoration plan is expected to result in attainment. A status update will be provided each 303(d) cycle to evaluate progress.

- **EPA Category 5M** - waters impaired due to atmospheric mercury.
