

Waters Identified for Delisting (Use Removed) Since 2016 Report

Assessment

Unit ID

Waterbody Name

Size

Potomac and Shenandoah River Basins

VAP-A32E_NOM04A00

Nomini Bay

2.4997 Square Miles

Delist / Use Removal Summary:

PARTIAL DELIST 2018 - Dissolved Oxygen - POTMH-DO-BAY / Fed ID 40923, 40924, and 40925 (CFL 2014)

POTMH failed the Deep Water Subuse's 30-day mean summer dissolved oxygen criteria during the 2016 cycle. It passed in the 2018 cycle; however, the area was not deep water during the 2018 cycle.

POTMH remains impaired for Open Water dissolved oxygen.

James River Basin

VAP-G02E_JMS02A00

James River

2.7904 Square Miles

Delist / Use Removal Summary:

PARTIAL DELIST 2018 - PCBs in Water Column 2.7904 mi² - G02E-04-PCB (CFL 2012)

During the 2012 cycle, the segment was impaired of the Fish Consumption- and Public Water Supply Uses due to two exceedances of the Human Health WQC for PCBs in water samples collected at 2-JMS087.01. The station was sampled in 2009.

Note: the segment extent for the PWS Use was shortened in the 2018 cycle due to a change in the Virginia Water Quality Standards. It previously extended to 5 miles above the old American Tobacco water intake but now stops 5 miles above City Point in Hopewell. The PCB impairment for the Public Water Supply Use in the upper extent will be partially delisted; however, the segment remains impaired for the Fish Consumption Use.
